**Webster County Condensed.**

Webster Co., Neb., lies in the Valley of the Republican, 120 miles west of the Missouri River and touches the State line on the south. Winters are mild and dry; very little rain or snow falls in that season so little in fact that cattle live all winter with no hay or grain. Plenty of rain falls in the spring and summer. The summers are not disagreeably warm, as there is always a cool breeze especially in the evenings. The county first began to settle in 1820. In 1827 the county was organized with a population of 85. Its population is now between 2500 and 3000 and is rapidly increasing. There are at present 20 organized school districts within its boundaries and school facilities are the richest ample-better than those in some Eastern States. The apportionable school fund furnishes nearly enough money to pay teachers' wages. Farmers can buy R. R. land from \$1.50 to \$2.00 per acre with low rates. There is yet a considerable amount of government lands for homestead and pre-emption. As a stock raising country it is hard to excel. Cattle do well, and for sheep about 25 bushels to the acre. Fruit does reasonably well. Every farmer has his orchard growing. Forest trees grow rapidly. Cottonwood, boxelder, whitewood, soft maple, and many other kinds of trees grow into timber large enough for fuel in about three years. (Sage, orange plants do well, and in a few years your live fences can be made. Mechanics find work, meat and fat wages. The very best and sweet water is obtained by digging from 5 to 100 feet. The best is very small when the well is bored—These wells never go dry. The streams of this county are the Republican and its tributaries, which are as follows: Dry, Buffalo, State, Peony, Cedar, Locke, Ash, and Guide Rock creeks. On the north side are Wilson, Elm, Cottonwood, Crooked, Indian, and Farmers creeks. In the north part of the county is the Blue river and its tributaries.

The soil of Webster county is a dark, rich vegetable soil. The wild grasses are nutritious and abundant, and make most excellent hay. Timothy, clover, Hungarian and millet will undoubtedly prove a profitable production. Those who have tried them so decide at least.

Our railroad prospects are good, and we will have a road as soon as we really need one. But the farmers for years will find ready sale for surplus products in the newer counties west and to new settlers. By the time those markets are closed roads for the proper transportation east will be opened. Our climate is beautiful, the air pure and bracing, and richness of any kind is almost a stranger to the people here.

The county seat, RED CLOUD, on the Republican river, near the center east and west and a little south of the center north and south. In it are the finest business men of every branch of trade. The county around is such as to war, and a good business in every kind of merchandise. Red Cloud and Guide Rock are the only two laid out towns. For their information can be obtained from any land agent who advertises in this paper, or at this office.

**Notice to Teachers.**
