The Modocs.

Time has worked fearful revenge among the Modoes since their treachery in the lave beds. Three years ago they were removed from Oregon to a resertion near Scheca, Mo. At that time they numbered 15d. Of this number 58 have die I since then, and the mortality last month was greater than ever. As in the case of the Fin Islanders, diseases to which they have not been accustomed, and of which they are entirely ingeough prevails among them, and eight have died of it. The saddest feature of their case is that there is no -physician at the reservation to care for them, and, as they know nothing of the diseases that have attacked them, they readily fall victims to them. It would seem to be part of simple humanity for the government to look into this matter. If it can furnish ponies, food, ammunition and arms to hostile Indians. it ought at least to furnish medical aid. to a little bandful of Indians, who are dwelling peacefully on their reservation,-Chicago Tribune.
