AGRICULTURAL.

It is reported that down in Tennessee there is a beetle that chews tobacco. Ten thousand orange trees were set out in the vicinity of San Jose, Cal., this season.

Crude carbolic acid mixed with sixty parts water is recommended for killing ticks on sheep. The rice crop of this country is coming to the fore again.

Pruning wounds should be covered as soon as the sap ceases flowing. Grafting wax, applied hot, will make a good covering and will avoid further serious trouble.

A little green bug is destroying the blue grass in Kentucky. Great fields are said to be ravaged by it, the grass looking as if it had suffered a protracted drought.

Sheep are being imported from Germany to England at the rate of about 20,000 a week. When American farmers set about to raise fine mutton, this branch of foreign trade will rapidly increase with us.

No farmer can afford to sell wood ashes at any price that the soap-boiler would pay. Where oats lodge, as they are apt to do upon heavily manured land, an application of ashes would save the crop.

Recollections of Aaron Burr. Dr. Ephraim Clark, of Staten Island, N. Y., who was a consulting physician called in Burr's last illness, gives some recollections of that once great man.
