As the Zulus believe that departed warriors take the forms of snakes they will not kill the reptiles even when they invade their kraals.

----The Wild Hog of India.

THOSE who have formed their concep-

tion of pig exclusively upon the tame Union. pig of the civilized sty have no adequate idea of the free wild pig of the Indian jungle. Like the North American Indian, the pig is debased by contact with civilization. He becomes cowardly, weak, dirty, and a prey to an inordinate thirst for swill. The distance between the tame Indian of Saratoga, en in the gutter, and the fierce warrior of the Western plains is not greater than that which separates the despised pig of civilization from the wild and fearless quarry of the East Indian pig-sticker. The latter pig.whose spirit has never been broken with pig ness and thrift. Every window-this is yokes, and whose moral nature has never been poisoned with swill, is one of the bravest inhabitants of the jungle, Tyrone (Pa.) Times. and has been known to attack and put to rout the majestic elephant and the

ferocious tiger. The full name of the East Indian pig is Sus indicus, though no one except a punctilious scientific person ever calls him by it. Among beginners in the art of pig-sticking he is sometimes magniloquently described as a wild boar -though he is very often a wild sow; but pig-stickers of reputation uniformly call him a pig or a hog. Sus indicus often grows to the length of four feet and eight or ten inches, and reaches the height of three feet, or even forty inches, at the shoulder. When full grown his strength is enormous, and in speed he will sometimes rival the fastest Arabian horse. He enters upon existence in a striped state; subsequent-

ly he becomes brown; when in the prime of life, he affects a dingy black color; and when old, he is gray and grizzled. At no period can he be honestly called a handsome or a graceful animal, but his courage and tenacity of life demand our respect.

Then he sat down by Susie, and they wondered what they should do; would they have to go without dinner and supper? Would they have to stay allnight there on the bill? "Oh, I am so thed!" said Susie, moy-

Do Isimals Reason.

In the Peris Monthly W. W. Kinsley gives facts to show that our poor rela-tions, the bates, are endowed with a faculty of reason. A clergyman testi-fies that he observed a fox playing in hes that he observed a fox playing in an enclosure where there were swine and their young. At length he mixed a block about as large as one of the pigs, and detect through the fonce, of course without slarming the mother-sow. Finding that the hole was large enough? and that he way not purmied, he returned and carried off a pig with-out exciting disturbance.

out exciting disturbance. Bishop wilson knew of an elephant whose billed eye was cauterized by a surgeon, emsing the poor beast to yell, but curing fim. By-and-by the other eye had use operated on with nitrate of silver, and they feared the elephant would fight the same doctor; but he re-ceived but kindly, and submitted at ouce to be operation. Huber me day saw a piece of comb fall in an we, because its supports were

fall in a live, because its supports were too went. The bees first fixed under it temportey supports, then fastened it paper: "Deck MaMa, We all up here Tangild in a BRitts Bash. Ould" Then he found a piece of string in his pocket, and tied the note around the white kitten's neck. When that was done, he turned her head down the hill towards home, and clapping his hands tation to enlist their whole force in the Sanny Rooms and Sunny Lives, AGAT is one of the most active agendes in enlivening and beautifying a ne. We all know the value of sunbut as a healthgiving agent to the avsical constitution; and it is not less "I'm going to send a letter in a boat to to our moral and spiritoal natures, now," he said, and again he alowly We are more active under its influence -can think better and act more vigorously. Let us take the airiest, choicest and sunniest room in the house for our living-room-the workshop where brain and body are built up and renewed, -And let us there have a bar window so matter how plain in structure; through which the good twin-angels of asture, sunlight and pure air, can freely enter. Dark rooms bring depression of spirits, imparting a sense of confine-ment, of isolation, of powerlessness, which is shilling to energy and vight-but in light rooms is good cheer. Even the children. Then she stepped to the door to see how they were getting furniture are dingy and brown, we have

Woolly Elephants in New York. Two "woolly" elephants of diminutive size arrived in this city on the steamer Oxfordshire from Singapore. They were the property of Captain Jones, of that vessel, who has sold them to Charles Reiche, an importer of

gine an Englishman so lost to all sense of decency as to shoot a fox, and next to that crime ranks, in Anglo-Indian estimation, the loathsome outrage of killing a pig by any process except that of pig-sticking. - W. L. Alden, in Harper's Magazine.

Dressing the Head.

In dressing the head, more errors are made by men than by women, although men are very fond of indulging the idea that when fashion is talked about

women only are referred to. Close caps, mufflers, tippets are often the causes of colds. Beside, the hair is rendered unhealthy and the hearing often interfered with. It is one of the virtues of the silk hat that it stands up a little from the head. If, as should be, there are a few holes made about seventeen degrees to the east of north, and at Calais, Me., as much to air without draught. The more open bonnets of women do not expose them so

much to evils of overheat, and inure them to exposure when not too severe. The hair is the natural covering of the head. It is somewhat doubtful whether any other is really needed. So we do not criticise women for treating the hat

the strongest and healthiest women ever born, and never has any pain from her head to her toes. It was an improvement when hat strings were made to come behind the ears

A Stork as a Mouser. A LARGE and handsome whooping stork, says the Council Blaffs Nonparie can be seen daily strutting around the yard at the residence of Prof. Paige in this city. The elongated bird was pur-chased by the professor during a visit to Mexico some months since and has become quite tame. Among other food among the bushes. that the stork relishes is a nice fat mouse. Mrs. Paige has a small wire

trap in the house, and whenever a mouse happens to wander therein he become a sweet morsel for his storkship. The other day Mrs. Paige noticed the bird standing near the barn watching in-BRille, CuM. tently at a small hole leading beneath the building. The stork remained in an attitude of watchfulness for nearly half an hour, and Mrs. Paige, becoming curious, concluded to watch and see what followed. Finally she saw a mouse creep into sight from under the wait barn, and the same instant the intelligent stork pounced down on the mouse and "took him in," killing it first and need be had so often been fed, he returned to the barn and set the trap down near the hole, evidently appreciating the use of the trap, and believing that it would catch a mouse for him. If anyone has got a brighter bird than that we would the bintred words: then eating it. After performing this as a mere head ornament and not a get out of patience, and marching to protection. Where changes of climate the house entered the kitchen, and
