MY LITTLE MAN.

- I had a bright and happy boy.

 His step was light, his heart was gay:
 With whistles, marbles gun and toy.
 He played each fleeting, livelong day.
- And, swiftly gliding down the street, Would stop for neither fence nor bars, Or any one he'd chance to meet.
- He whistled for the crossings loud, Nor would be look to left or right: His thoughts soured higher than the clouds, Or swallows in their homeward flight.
- He brought me comfort every day,
- For he was such a little man; And in the future, far away,
- Sometimes my heart grew strangely sad. While gazing on his little form.

 And yearned to shield him from all bad, From every tempest, cloud and storm. I prayed for help each passing day, To guide his little, busy feet.

 And lead him in the Heavenly way.

therein.

A Pleasing Experiment.

Every time I try to improve my mind with science I resolve that I will never do it again, and then I always go and do it. Science is so dreadfully tempting that you can hardly resist it. Mr. Travers says that if anybody once gets into and that his ungrateful townsmen put the habit of being a scientific person out his eyes to prevent the fulfillment of there is little hope that he will ever reform, sad he says he bas known good men who became habitual astronomers. and actually took to prophesying weather, all because they yielded to the emptation to look through telescopes. and to make figures on the blackboard

with chalk I was reading a lovely book the other isy. It was all about balloons and arachutes. A parachute is a thing you fall out of a balloon with. It is nobody ever borrows it. If you hold a parachute over your head and drop out of a balloon, it will hold you up so that you will come down to the ground so gently that you won't be hurt the least

told Tom Maginuis about and we said we would make a parachute, and jump out of the ond-story window with it. is easy enough to make one, for all you have to do is to get a big umbrella and open it wide, and hold on to the handle. Last Saturday afternoon Tom came cientific experiment."

We didn't have the least doubt that the book told the truth. But Ton: didn't want to be the first to jump out of the window-neither did I and we thought we'd give Sue's kitten a chance to try a parachute, and see how she liked it. Sue had an umbrolia that was comber, 1631. made of silk, and was just the thing to | We have no means of knowing what suit the kitten. I knew Sue wouldn't mind lending the umbrella, and as she was out making calls, and I couldn't ask her permission, I berrowed the umbrella and the kitten, and meant to ell her all about it as soon as she came ome. We tied the kitten fast to the andle of the umbrella, so as not to burt good thing, for it is the air which holds up a parachute, and of course the s, and the better the parachute will tife American.

stav up. The minute we dropped the cat and the umbrells out of the window the We chased it till we couldn't run any work faded gradually out of sight. The it her fault that her way of having it longer, but we couldn't catch it, and last traces of them were proffers of "a was necessarily cheap and original?" the last we saw of the umbrella and the pair of pantaloons made in six hours."
