How rarely does does a farmer contemptate a newly harrowed field with satisfaction? Ho walks over it and sees here and there seed unconvered; here a furrow slice untouched because the surface was not quite level, and there a bunch of stubble drawn into a heap having dragged the soil and seed before it for yards. He shakes his head sadly and wishes there was a harrow that would do the work perfectly; leveling the rough places; breaking up the clods, and not only pulverizing the soil, but turning it over the seed seed so fhat this is all covered to an even depth and without waste. But the farmer who uses the "Acme" Pulverizing Harrow, Clod crusher and leveler has none of the sadness and disappointment, for his fields are leveled and mellowed and smoothed and the seed properly covered. Fall plowed ground especially needs this perfect work which is done quickly and without the need of any spring plowing This also is a good cultivator until the corn is above twelve inches in heighth.
