

HOME, FARM AND GARDEN.

Good feed and abundant pasture will not keep animals in good condition unless they have plenty of pure water.

Gardening is regularly and practically taught in more than twenty thousand primary schools in France.

Risk: Two tea-cupfuls of raised bread dough, one tea-cupful of sugar, one-half cupful of butter, two well-beaten eggs, and flour enough to make a stiff dough.

A Canadian horticulturist advises shading gooseberry bushes to prevent mildew. He had been troubled with the birds taking the berries, and had a frame placed around the bushes, and laths nailed to it near enough together to exclude the birds, and this proved to be the exact shade required.

No garden will give satisfaction if it is cold and wet. The advantage of a few ditches or tiles under ground can not be estimated.

Small Orchards. It will not as a rule pay general farmers to go into fruit raising on a large scale, or attempt to do so.

The nestler in Texas is the cattle king's neighbor, but between them there is a wide gap in rank. A man may own a section of land and have fifty, 100 or 200 head of cattle, but he is only a nestler.

There are two ways of treating these nestlers. One is Charles E. Brown, a young country stockman, to the Globe-Democrat correspondent.

A Fine Paper. The boy had just brought some papers to the editorial room fresh from the press, and the force were engaged in commenting on the issue.

Good paper to-day, gentlemen," remarked the editor. "That leader of mine, if I am not very much mistaken, will cause a sensation among—"

Well, gentlemen," said the proprietor of the establishment, entering the room, "one paper to-day. There's not much in it but advertisements, but that's what pays."

Handsome Black Dresses.

The handsomest black wool dresses have the basque and drapery of Henrietta cloth, with a soft vest and plaited skirt of striped black and white gros-grain, or stripes of black satin or of velvet on ecru gros-grain, or else checked black and white silk on which are raised black velvet figures.

Quantity of French imitations thereof, or the rich Escurial laces. Ecru laces and the jetted nets are also used for such dresses. Lace dresses, as they are called, will be the summer fancy for black dresses, and are already worn in the houses.

Soil ground is better plowed in the fall, in my opinion. The soil can not yield the corn any available plant food until decomposed, and if plowed in the autumn it will partly decompose during the winter and be ready for the corn in the spring.

Two of a Kind. There are two members of the House who have twin brothers who greatly resemble them. The legislators who rejoice in duplicates are Phil Thompson of Kentucky, and Representative Horr of Michigan.

Corn and Corn.

The greater excellence of "rod-corn" has become proverbial. It is true that no other ground yields such bountiful crops of so great excellence as rod ground.

Cancer for Twenty Years.

Mr. W. R. Robinson, Davisboro, Ga., writes, under date Jan. 3, 1884: "I am getting on finely, the ulcer is gradually healing. I feel that Swift's Specific will cure the horrible cancer which has been feeding on me for over twenty years."

Mr. O. G. Barron, of Banning, Ga., writes, dated March 3, 1884: "The cancer has all gone out of the Cancer, and my health has greatly improved. I have taken six bottles of Swift's Specific, for a skin Cancer, which I have had for years."

"Horn, flat crowns are most in favor." An American girl will take almost any kind of crown and not complain.—N. Y. Graphic.

A Popular Fallacy. Many people think that Rheumatism can not be cured. It is caused by a bad state of the blood which deposits poisonous matter in the joints and muscles causing lameness and excruciating pains.
