the facts are mearer-there had been a tremendous rain near Clinton, the county seat of Van Buren, on the upper Red river, and it was near this place the accident took place. Emmerson, who is an old settler in Van Buren County, was with his family in his house at night when the storm was raging. After an hour's rain the water gradual y flooded his bouse and fearing he and his family would be drowned, he gathered two of his in his arms and made for the door to escape. As the door opened, a huge log affoat dashed in the entrance and knocked the little ones from his arms. They fell at his feet into the swift current and were lost. He then took up two more, one in each arm, and succeeded in getting out with the safe, telling his wife to follow with the others but in attempting to escape in the same manner the mother, with two children in her arms and three clinging to her tress. was carried down with the flood and

The father and two children, the only ones left in a family of eleven, escaped with their lives. The night was dark and the father, with the only two survivors of his large family, stood in water above the waist clinging to a tree for several hours, and when the waters subsided in the morning a search was made and the dead bodies of the mother and seven children were discovered scattered here and there for a considerable distance around the place, the cloth ng having caught in underbrush and the bodies held fast in that way. BURKE INDICTED.

The Chicago Grand Jury Indicts the Arrested Party at Winnipeg CERCAGO, June 20.—The grand jury in the Cronin case at noon yesterday returned an indictment against Martin

Burke on two counts. Burke, alias Martin Delaney, otherwise called Frank Williams, is indicted first for murder and secondly for conspiracy with Coughlin, O'Sullivan and Woodruff for the purpose of committing murder.

Application will at once be made to Governor Fifer by an officer who is now in Springfield for papers for the extradition of Burke. These papers, properly attested, will be spread before the State Department at Washington and the Secretary of State will make the formal request to the Canadian Government for the surrender

It was only with reluctance that the grand jury returned an indictment against Burke, and his partial identification by photograph being the only evidence against him it is safe to say that the request of Ch ef Hubbard and State's Attorney Longenecker would have been ignored and an indictment denied until the Chicago people had pro-ceeded to Winnipeg and clearly identified the prisoner as one of the Williams Brothers. The testimony of Michael Gavin, of the Chicago sewer department, who had known Burke, was very conclusive, however, and it was upon his evidence that the indic meut was retu ned. Gavin testified that he had known Burke for a long time, that he had frequently heard the latter boast of his friendship with P. O'Sallivan and others of the suspected parties and that on one occasion Burke had expressed his conviction that Cronin was an enemy if not a traitor to the frish cause.

An Aged Murderess. INDIANAPOLIS, Ind., June 20.-December 12 Richard O. Allen, an aged farmer living five miles southwest of Washington, Ind., was found tied to a tree near his house with his throat cut from ear to ear. The death was thought to be a case of suicide and no inquiry was made. A few days ago, while laboring under religious excitement, Mrs. Charlotte Allen, the seventy-year-old widow of the dead man, confessed to two colored servants that she committed the crime. She said that she and her husband had trouble as to who was the rightful owner of the farm and in order to settle the dispute she gave her husband morphine in his tea. Allen fell asleep in the garden and she procured a table knife and a rope and going to the place where her busband was lying, tied the rope around his body and, making several slashes at his throat, half severed the head from the neck. She then dragged the body to a tree and tied it there.

Still Finding Bodies. Johnstown, Pa. June 21.-Twelve bodies were taken from the ruins yesterday. They were so badly decomposed that mone of them could be identified. The laborers have become dissatisfied and waited upon General Hastings last night and notified him that they would strike, provided they were not given \$1.75 per day. They now get \$1.50. WAR MUTTERINGS.

an Powers Again Disturbed-But-

LONDON, June 21 -Peace or war? This is the question asking itself now, and the profoundest judgment of the wisest states-men in Europe is unable to furnish an answer. Those who speak for the Government most immediate y involved in the warlike rumors are ready enough to declare that there will be no war. Toese are the as-Vienns and from St. Petersburg. Bet it answer it." is noteworthy that while the words that issu . from the lips of those who hold the destinies of Europe in their hands are as peaceful as the sucking dove, their acts

savor much more of blood and iron. The Powers most directly affected by war rumors in the air are Russia and Austria, and however sincere may be the assurances of each that her intentions are peaceful, there is no question whatever atout the great extent of the war preparations at this moment being made by both. Such a despotism as Russia is ab e to a great extent to do its work in the dark, and little in the way of information for the outside world can escape the

argus-eyed Russian censors. Notwithstanding this, however, enough information passes the Russian dead-line from time to time to establish the fact without question that immense war prep arations are going on in Russia and on a scale that has not seen equaled since the war with Turkey. Austria has greatly augmented the force of men engaged in fortifying the line of the Darina river, on the Servian frontier. That the character of these works is extremely formidable is not denied at Vienna, and while Austria insists that they are intended only for defense, Russia looks on suspiciously and notes the facility which these works will furnish for an incursion into her territory when the time for action arrives.

Servia, governed as she is for the time by a weak executive, and hampered by an uncertainty as to the future of her present infant monarch, is in no position to make formidable war preparat ons, but Montenegro, aided with fnancial support from Russia, is already armed to the treta, and her army is on a war forting. Russia is constructing armored ships on the Black sea and pu hing them forward to completion in hot haste, while on the Pac fie she is increasing her fleet, fortifying her harbors anew and generally clearing her decks

If the outcome of all this extraord nary preparation is to be sweet and genile peace, then it will become useless hereafter to pay any heed to the most significant facis which may portend war.
