> eports have considerable influence in checking any complicated corner, and every body is enabled to know the precise condition of the crop. As they prevent fluctuation rather than increase the more frequent they are made the more gradual and pacific the condi-

tion becomes." "Is it a fact that the report is most unfavorable one ever issued?"

"Not at all. The cotton crop is en traordinarily good. Oats are probably lower than they have been for twenty years but that is the only weak point, with the exception of the harloy crop, which was very prolific last year, how-

"Hew is the quality?"

"Uniformly fair, except as I have stated, with oats, which are not only short, but poor in quality. The barley crop is merely good. I think that this country should raise less wheat and import less barley. We export wheat and import barley, and there is no reason why we should not raise it all. The exportation of corn this year will be about the same. This is not very large, however, as foreign nations eat but very little corn. I think that on the whole there is no cause for any trepidation on the part of those controlling the mar-
