THE secretary of the treasury has informed the speaker of the house that the deficiencies of the government for the current fiscal year are estimated at \$14,636,529, of which \$10,500,000 is on account of pensions.

'IT is said that Henry Irving, the actor, practices himself in a new part by requiring an understudy to imitate his action in the character. He will stand in the wings of the stage and have the imitation of himself produced again and again in order that he may see himself as others see him. There is a suggestion in the practice which might be acted upon with a deal of profit to their daily lives by many who are not on the stage.

COMMERCE is always on the ontlook for whatever may contribute to its safety. The Azores are to be connected with Europe by cable and European weather prophets are indulging in the hope that the islands so eligibly situated in mid-Atlantic ocean may be utilized as meteorological stations. As most of the European storms come from that quarter a station in the Azores would be of the utmost value to science as well as to the world's commercial marine.

EDWARD E. HALE supports the idea of Miss Willard's nomination of Jean Ingelow for poet laureate. He says, in the Boston Commonwealth: "A queen should have a woman for laureate. the condition of the treasury. It is the expectation of the leaders that with the exception of Monday, when bills concerning the District of Columbia will have right of way, practically the whole time of the house during the week will be devoted to consideration of the regular appropriation bills. The debate will begin on the army appropriation bill, which the military committee will report to-day and which Chairman Outhwaite at present

intends to call up to-morrow. It is likely that the debate will take a much wider range than this bill and will embrace the state of the revenues of existing appropriations and, it is possible, of the policy of the democratic party. The army bill in its aggregate shows a reduction from the total amount carried by the bill for the current fiscal year, but there have been entirely cured of Conseveral increases made in the appropriations under the head of "department of
