SAVED HER SLIPPERS.

A Bit of Hit serto Unpublished History of the War of 1812.

This is a chapter of semiofficial, semidomestic history, and it is vouched for by a granddaughter of the hero's family line, a Chicagoan who now lives on Dearborn avenue.

Prominent in Mr. Madison's cabinet the Navy Jones, the son of a famous naval histories of the war of 1812. But the successful secretary had more wit than hair, and a wig was a sine qua non of his political and social life. All

It will be remembered that President Madison and his cabinet stood not upon the order of their going on that occasion, but went at once—to a very retired summer resort. Every one knows how Lady "Delly" remained behind long enough to save some valuable White House portraits from having their eyes put out by English bayonets, but few have heard how collected Mrs. Sec-

retary Jones was in this national crisis. Presence of mind is said to be promoted by absence of body. This lady displayed in the face of danger presence of both mind and body. As the secretary emerged from his doorway, his hands full of such family valuables as his agitated condition had allowed him to collect, Mrs. Jones confronted him with the appalling words:

"My dear, you have forgotten my alippers. You must go back and get

General Ross was almost at his door bringing imprisonment or death, but the unhappy man turned back to hunt the alippers, which, it is only fair to Mrs. Jones to add, were adorned with diamond buckles. In his headlong quest for these treasures—which he secured—his wig dropped off in a dark corner, and he did not dare to take time to hunt for ltless in all appoint ments of dress, is said to have very much lessened the melancholy of the cabinet journey. It is further asserted that during the time of retirement, no matter how depressed any member of the presidential party felt over public and private woes, if he but glanced at Secretary Jones peal upon peal of irresistible laughter was sure to follow and that the despoiled Adonis cordially joined in these bursts of merriment.-Chicago Tribune.

A Hotel Guest Who Had for Hours Been Thought a Sleeper.

The corpse of Thomas J. De Puy, an attorney of Seattle, sat bowed in the attitude of sleep nearly all day in the busiest part of the office of the Golden West hotel, in San Francisco the other day, and none who jostled the dead or sat down close beside the rigid form knew that it was a dead man until 3 o'clock in the afternoon.

The man sat down in a stupor about 7 o'clock in the morning, before the bustle of the day began. His brain was benumbed with drink, and probably also with poison taken to escape from a troubled clife. When he sat down he crossed his hands in his lap, pulled his hat down over his eyes which were closed a d shadowed by heavy eyebrows, and dropping his head on his breast, went to sleep. He must have died during the morning, and without moving.

Night Clerk Hildebrant saw him there and let him sleep on when he went off duty at 3 o'clock. By 9 o'clock and during all the rest of the it nor to attempt the purchase of an. day the place was crowded with guests other. The shorn appearance of the sec. and others. The chairs on either side of him were seldom vacant. Men stumbled against his feet in sitting down to read the morning papers, but it was none of their business if some guest had been up drinking all night and was fast asleep in the chair. So the corpse sat there and grew rigid hour after hour near the big front windows. As the afternoon was wearing away some man who had loafed there some time thought he would do a neighborly act by rous-

ing the man asleep. "Partner, hadn't you better wake up?" he said as he gave a shoulder g slight shake, but the form responded strangely to the touch. He gave the head a push, but the neck was stiff and the head did not move. When the morgue wagon came rigor mortis was far advanced, and it was plain that the man had been dead for several hours.

Remedy for Dirty Streets. Mayor Strong of New York has not only a pronounced opinion in favor of Mrs. Eleanor Kimicuti's plans of street cleaning, but is quoted as follows: "I believe," he said, "the streets of New York could be cleaned by a woman at the head of the street cleaning department. I don't know that it would be a popular appointment. I do know one thing, that all of us are indebted to our wives and our mothers for clean homes, and I don't know any class of persons who would be so likely to clean our streets thoroughly and for less money than a

Always Keep to the Right. The polite dodging that sometimes occurs between passers in a narrow passage was happily solved once by a tall, ungraceful, bulky Vermonter, who extricated both from the position by saying: "If you will stand still, madam, I will go home." Joseph Ritchie of Roxbury used to tell an experience of his in the days when ladies' gowns trailed on the sidewalks and in street cars, and their tempers flashed out if anybody trod upon them. Looking straight at the flushed cheeks and wrinkled forehead, "I excuse you ma'am," said Mr.

IN AN UNWONTED ROLE. Untoward Results of Substituting a Bull

for a Horse in "Mazeppa." Jim Larkin was a noted character the British marched from Bladensburg perhaps, as are those of James Gor- and had his nose into everything. There was never a dog fight but in some way he got bitten; never a fire SAT IN THE OFFICE DEAD. but he got burned, and never an accident but he was there in time to get hurt. Larkin was something of a showman. During his residence in Cheyenne a colored tragedian filled an engagement in the city, playing "Hamlet" and "Othello." Larkin saw in the colored man a great opportunity to make money and induced him to play "Mazeppa," using a wild bull instead of a wild horse. The tragedian fell into the idea and rehearsals for the great event were had. The performance was given in a large hall, which was crowded to the doors. The play went off lovely until it was time for the wild bull of Tartary to be brought on and then there was a slight hitch. The bull had suddenly become reluctant about going on the stage. Manager Larkin got behind him and gave the animal's tail a twist. It had the desired effect. The bull rushed upon the stage and tore out every foot of scenery and then jumped off into the orchestra, landing on top of the slide trombone player. The audience stampeded and jumped through the windows and doors, and in a very few minutes the bull had everything to himself. The "Mazeppa" engagement closed that night

Her Hair Turned White. A Portland young lady received a few days ago a letter from a friend who appealed for aid in finding something to restore the blackness of her hair. The friend had suffered almost unendurably from neuralgia in the head, and had tried many vaunted remedies. Finally she was advised to have her hair shaved or cut extremely close, and adopted this desperate measure. The result of the experiment has been that with its renewed growth the hair is appearing perfectly white, though it had been previously very dark, and the wearer is terribly chagrined at the unexpected change. The effect upon the neuralgia was favorable.

A MAMMOTH PEARL. It Was Purchased by the Strategical Method.

"An extraordinary treasure, illustrating the successful manner in which gems can sometimes be procured by the 'strategical process,' was lately shown by the Smithsonian institute. This was a pearl, the size of a pigeon's egg, of exquisite rose color, and the receptacle containing it was the original fresh water mussel in which it had been formed. The nucleus of this wonderful stone was nothing more nor less than an oval lump of beeswax which had been placed and left for a few years between the valves of the mollusk, which had at once proceeded to coat it with the pink nacre it secreted for lining its shell. The mussel was kept in an acquarium while engaged in its lengthy task. It belonged to a species common in American rivers, and it is suggested that the result of the experiment opens to everybody the possibility of establishing a small pearl factory for himself, by keeping a tank full of mussels, and humbugging them into making great 'pink pearls' for him. But the intending experimentalist is cautioned against avarice; the 'nucleus' must be introduced well under the mantle of the creature and, above all, it must not be too arge."

OVER LAND OR WATER.

German Inventor Able to Travel

Seven Miles an Hour on a River. A tricycle which can be made to travel either on land or water is the invention of a Hamburg genius named George Pinkert. The machine is so large and heavy that no such speed can be gotten out of it as is made every fair day on city boulevards, but Herr Pinkert thinks he s accomplished much in doing nine and one-fourth miles an hour on land and seven and one-half on the smooth surface of a river. His tricycle has motor wheels fifty-three inches in diameter and nearly twenty inches thick. They are made of sheet iron, and are divided into three watertight compartments, which are filled with air. On the outside of these wheels are flangeboards about four inches wide by seven and one-half in length. The steering wheel is about a yard in diameter and sixteen inches thick, and has two water-tight compartments. The wheels have rubber tires which allow them to run on land. The whole machine weighs

about 210 pounds. Rubinstein and Munkacsy.

Of all the anecdotes of which Rubinstein was the hero none amused him more than the following: When Munkacsy's "Christ Before Pilate" was shown in New York a reporter called on the picture dealer to whom it belonged to interview him on the rope running over a pulley. As she subject of the painter. He was received by a clerk, who remarked the rope suddenly gave away and she among other things that Munkacsy was the greatest painter 'since Rubens' time." Now, the reporter was grossly ignorant of art, had recently been writing on Rubinstein to remain in this painful situation and accordingly the interview, when statement that Munkaesy was the greatest painter since Rubinstein.

Cockney Attendants "on the Door" Make It Pleasant For Visitors.

A noticeable feature of the Anglomania which prevails in some parts of Chicago is the employment of cockney attendants by some of the clubs. A Bump For Locality.

A small boy from Lansing was in Detroit not long ago with his mother for the first time. It was also her first visit to the city, and she was almost as much interested in the sights and as confused by the bigness as the boy was. They had been out with the head of the family and had returned to their

city, and so she humored him. 'Where would you be?" she inquired. "I'd be lost," and she believed him thoroughly. - Detroit Free Press.
