ABOUT FARM DAIRYING.

What Prof. Wing, of Cornell University,
Thinks of It.

Many think that the creamery butter
is better than can be made on the
farm.

Now, this is entirely erroneous. Not
only is it perfectly possible to make as
good butter on the farm as can be made,
but is a matter of no great difficulty
and does not require an expensive or
elaborate equipment. The principles
that govern the manufacture of good
butter are the same in either case;
their observance will result in good but-
ter on the farm just as surely as their
neglect will result in bad butter in the
factory. That this is so is seen in the
fact that numerous private dairymen,
having recognized these principles, are
getting more for their butter made up
in a small way in a private dairy than
is given for the very best grades of
creamery butter. Indeed, from the fact
that the private dairymen can control
the cows, their feed and care, and the
milk from the time it leaves the cow
until the finished product goes on the
market, he should be able to make a
finer and more uniform product than
the factory man, who cannot control
these important conditions. Notwith-
standing the possibilities in the case,
the facts are that to-day the great mass
of butter made on the farms is sold for
a less price than that made in creamer-
ies. Let us look for a moment at some
of the reasons for this condition of af-
fairs.

In the first place, there is a large
amount of butter made on farms that
is not good to begin with, and justly
should not bring any more than it usu-
ally does. This sort of butter is made
where the cows and butter making are
a sort of side issue of the farm, where
the milk and butter must wait the de-
mands of all the other farm and house
work before they receive attention. It
is made where the maker is ignorant,
careless and dirty. The cows are milked
at the convenience of the hired man,
and the milk is strained and put into
the creamery at some indefinite time
thereafter, when the hired girl gets
ready. Sometimes the cream is re-
moved in 24 hours, and some times not
in four days. In hot weather the
cream gets too sour, and in cold, it
sometimes never gets sour at all. It is
churned at a temperature sometimes too
low, but oftener too high, and never
twice alike. The buttermilk is not
completely removed, salt is added by
guess, and it is worked by main
strength till the dairy maid gets tired.
During the whole process it associates
more or less intimately with the cooked
and uncooked food in the family pan-
try, and the wonder is, not that it is
bad, but that it is as good as it is.

ABOUT FILLED CHEESE.

The Practice of Making It is a Very Re-
prehensible One.

It is a fact that American cheese
makers have lost their prestige in the
markets of the old world on account of
the character of the product sent from
this country, and Canadians have, to
a great extent, taken the place thus left
vacant.

There is probably more filled cheese
made in Illinois than in any other state
in the union, though Wisconsin is a good
second. The practice of making filled
cheese is a reprehensible one, and the
evil is a growing one, for Chicago con-
tains a long list of sinners in this re-
spect.

If the cheese thus made could be sold
to the consumers for just what it is,
there would not be so much harm in it,
for he could buy it or let it alone, just
as best suited him. It is due the mak-
ers of filled cheese in Chicago to say
that they make no pretense that it is
full milk cheese, but make and sell it
for exactly what it is; but after it
leaves the hands of the maker it is
palméd off as pure cheese, regularly
made, and this is what gives American
cheese the reputation it has abroad,
and what has taken the trade away
from us and given it over into the hands
of Canadian cheese makers.

There should be laws to make this
state of affairs impossible, but so far
there has been no effective movement
to check the making and sale of hog-fat
cheese for full cream.—Farm and Fire-
side.

FROST-PROOF PUMP.

A Box That Will Prevent Freezing Even
in Very Severe Weather.

A box of the right size and shape is
procured, and, with one end removed,
is set about the pump and firmly and
tightly fastened to the platform. The

cover is hinged to form the front, and
a longer spout is used instead of the
one that belongs to the pump. This
long spout can be bored out of a piece
of pine in a few moments. This inclosed
air about the pump will keep it from
freezing, even in very severe weather
if the door to the box shuts snugly, and
no other cracks let in the cold air.—
Orange Judd Farmer.

Tuberculosis in Calves.

In some of the experiments in Iowa
it is found that calves born from tuber-
culous mothers, when allowed to take
milk from their mother developed tuber-
culosis, but when raised on milk known
to be healthy, did not become affected
with the disease. This has raised the
question whether the children of con-
sumptive parents could not escape the
disease if at once removed from their
care. The point is an interesting one,
as it involves the question of inherited
tendencies, and we hope that scientists
will endeavor to shed more light upon
it.

besides. THE FARMER will be an excel-
lent medium for the farmers of the
country, and one that will be full of in-
teresting articles on the farm and all
matters pertaining thereto. This offer
will be good until April 1, 1896, or we
will send it to any of THE CHIEF sub-
scribers who will hand us 10c during
the dates mentioned. This is a special
offer and will not hold good after date
expires. Come in at once and leave your
name.

Notice.
There will be a meeting of the
democratic county central committee
at Blue Hill, Monday, April 6th, at 3
p. m., for the purpose of arranging a
call for the democratic county con-
vention. All members are requested
to attend. HENRY KOEHLER, Chm.
F. T. HOPKA, Sec'y.

Wanted Pasture
For about 75 head of horses. Write
me your terms, amount of pasturage, etc.
THOMAS E. KELLY,
Lincoln, Neb.

Rheumatism

Is a blood disease and only a blood reme-
dy can cure it. So many people make
the mistake of taking remedies which
at best are only tonics and cannot possi-
bly reach their trouble. Mr. Asa Smith,
Greencastle, Indiana, says: "For years
I have suffered with Sciatic Rheuma-
tism, which the best physicians were un-
able to relieve. I took many patent
medicines but they did not seem to
reach my trouble. I gradually grew
worse until I was un-
able to take my food or
handle myself in
any way; I was abso-
lutely helpless. Three
bottles of S.S.S. re-
lieved me so that I
was soon able to move
my right arm; before
long I could walk
across the room, and
when I had finished one dozen bottles
was cured completely and am as well as
ever. I now weigh 170."

A Real Blood Remedy.

S.S.S. cures Scrofula, Cancer, Eczema,
and any form of blood troubles. If
you have a blood disease, take a blood med-
icine—S.S.S. (guaranteed purely vegeta-
ble) is exclusively for the blood and
is recommended for nothing else. It
forces out the poison matter perman-
ently. We will
send to anyone
our valuable
books. Address
