

# CROWNED WITH HONOR.

## The Great Presbyterian, Rev. Charles L. Thompson, D. D., of New York.

### What Oaine's Celery Compound Has Done for the Eloquent Preacher.

From no one class of men has Paine's celery compound received more unstinted praise for its wonderful powers of making the sick to be well again than from ministers of the gospel in every denomination.

Rev. Father Ouellet, Rev. Dr. Meek, the editor of the "Central Methodist," Rev. Dr. Baird, Rev. W. J. White, D. D., of the Georgia Baptist, are among the hosts of clergymen who have gratefully published, that their experience might be of benefit to others, the ever true story of how this greatest of all remedies makes people well, building up the shattered nerves, enriching the thin blood and rooting out disease.

Rev. Charles D. Thompson, D. D., pastor of the Madison Avenue Presbyterian Church in New York city, is a man crowned with honor. Before going to the celebrated church where he now preaches in New York he served in prominent pulpits in Cincinnati, Chicago, Pittsburg and Kansas City. He has written much and well on themes of public interest, presided over the Centennial General assembly in Philadelphia, and has been often

a commissioner and chairman of leading committees, and an exceptionally forcible debater in all the church courts.

His large charity has made him a welcome representative of his church to other churches and to his brethren of other lands.

Dr. Thompson is a prodigious worker. He is one of the many thousands who have discovered what Paine's celery compound does for those who are worn out by labor, who are suffering from some stage of nervous exhaustion, and who require a healing-giving remedy that will speedily replenish the system with proper nutriment.

Writing from New York June 23, Dr. Thompson said:

"I think to the use of Paine's celery compound is due the fact that after a winter of exhausting work I have been able to carry my duties through the enervating springtime with unusual ease and comfort."

To the multitude who suffer from the enervating effects of the warm weather in this climate, this plain, straightforward statement from so eminent and

fearless a clergyman should be heeded. Paine's celery compound has put an end to an enormous amount of sickness and disease.

It began at the very outset of its splendid career to cure men and women of kidney troubles, liver complaints and nervous prostration. Its speedy and lasting cures of all these nerve and blood disorders were not slow in spreading its reputation through every state in the country. Physicians everywhere greeted the great remedy as the most enlightened, most skilled means that could be employed for invigorating the "run down" system.

Thousands of wholly disinterested men and women saw their neighbors and townspeople made well by Paine's celery compound.

This epoch-making discovery in medicines due to the patience, thoroughness and zeal of the great Dartmouth College scientist, stands today unquestioned as the greatest brain and nerve strengthener and restorer the world possesses.

#### PLEASE ANSWER.

First—Why is it that Mexico with free coinage—1st—has no gold in circulation—2d—has only a per capita circulation of less than five dollars—3d—pays only about two-thirds as much wages, or less, for common labor as our country—4th—everything to be bought is just twice as high in silver as in gold.

Second—How are all our mortgages, stocks, etc., that are made payable in gold to be paid if gold is to be driven out of the country?

Third—Anticipating the last question to be answered by the statement that gold will not be driven out of the country, I ask this:—Mexico with billions of cheap silver British Canada with as much more, to say nothing of other countries with an unlimited amount will rush their silver to our mints to be coined. They want but little of our products then what will they ask for their silver? Why gold of course. The government will refuse to give it to them so they will exchange with individuals, anyone who will give them the yellow metal which they can use in their own country. If the government refuses to exchange will not individual refuse also unless they get a fine premium? Men who have gold laid away can make good deals by exchanging when they can use silver money to pay taxes and other government debts.

While there is no danger practically of the silver bugaboo coming into force even should Mr. Bryan be elected, yet it is ever should at the ruinous ratio of

16 to 1 it would be the greatest curse that could happen to us except war. U. G. KNIGHT. Invaile, Neb., Aug. 10th, '96.

We live in a country of which the principal scourge is stomach trouble. It is more wide spread than any other disease, and, very nearly, more dangerous.

One thing that makes it so dangerous is that it is so little understood. If it were better understood, it would be more feared, more easily cured, less universal than it is now.

So, those who wished to be cured, take Shakers Digestive Cordial, because it goes to the root of the trouble as no other medicine does. The pure, harmless, curable herbs and plants, of which it is composed, are what render it so certain and, at the same time, so gentle a cure.

It helps and strengthens the stomach, purifies and tones up the system.

Sold by druggists, price 10 cents to \$1.00 per bottle.

It is much easier to steal a bicycle than a horse. The horse cannot be reported and changed in an hour so his owner would not know him. Stealing bikes has become so common as to require some special legislation.

Theories of cure may be discussed at length by physicians, but the sufferers want quick relief, and One Minute Cough Cure will give it to them. C. L. Cotting.

A. C. HOSMER, Editor. LEROY TAYLOR, Local Editor.

SWORN CIRCULATION 1,300.

To the Editor—I would like to answer a few of Mr. H. R. Carpenter's questions and ask him a few more.

First—Mr. Carpenter misinforms us, either willfully or through ignorance, in regard to the price of silver in 1873. From the best of advices I find that silver fluctuated slightly during the year but at no time was 37 1/2 grains of pure silver worth less than \$1.004 a small margin to be sure but plenty large enough to keep silver from going to the mint. It was only two cents cheaper in 1874; 4 cents cheaper in '75 and it gradually cheapened as the production of silver increased.

Second—Free coinage would cheapen money—silver money—beyond doubt. It would make a silver dollar worth about 55 cents as it is in Mexico today and would take nearly two dollars to buy one dollar worth of stuff. Wages would not be increased while everything that the laborers had to buy would be higher in silver money except wheat and other articles that we export in large quantities. The price of wheat is made in Liverpool and we have to take it.

Third—We do not claim that gold would go to a premium, that is that it

would be worth more than it is now but it would be fixed in value as it is now while silver would be cheaper thus forcing gold to a premium over silver and also driving it out of the country in exchange for other countries' cheap and plentiful silver.

Fourth—We have no authority for the statement that silver under free coinage would go to the price it was in 1873 except the statement of Mr. Bryan and other p-p's while all reason tells us that it will not in the face of the fact, that, cheap as it is, more than three times as much silver was produced in 1895 as there was in 1873 at good prices. If Mr. Carpenter is bound to have gold and silver for money why not cut the gold dollar in halves and coin that with half as much gold in it as to put 50 cents worth of silver into money and call it a dollar? Would not that be just as logical.

Fifth—David Hume doesn't say anything about falling prices and the purchasing power of our money reduced one-half. If the one is bad both would be doubly bad. There have been "disasters of the ages" much worse made by poor money than ever by falling prices.

Sixth—Mr. Carpenter would reform the world. He is a better financier than all the diplomats and wise men of all the enlightened countries. Where is there a country on a solid basis that has a paper money not "redeemable?" Our own gold coins and standard silver dollars are not redeemable but all our other money is and that is just what makes our country stable.
