SINCE VICTORIA WAS CROWNED.

There Have Been Great Social Reforms and Wonderful Inventions. Great social reforms belong to Queen Victoria's reign, writes William George Jordan in Ladies' Home Journal, narrating the progress of the world since Queen Victoria ascended the throne 60 years ago. The degrading practice of flogging has been abolished in the armies and navies of America and England. Children are no longer permitted to work in the mines of Britain. Press gangs no longer force men into the service of the queen's navy. The Red Cross society, approved by 49 nations, has softened the horror of war. The transportation of criminals, with its many evils, has been suppressed. Ex-ecutions are no longer conducted in public. The treatment of eriminals has ecome humane. Factory laws and building acts make life easier for the DOOF.

Inventive science has made marvelous progress in every department during Victoria's 60 years as queen. Cantilever bridges have surprised the world. Travel has been wonderfully quickened by street cars, cabs, trolleys, cable cars, elevated roads and other triumphs of invention. In 1837 there were no type-writers, no passenger elevators, no modern bicycles, no soda-water fountains, no horseless carriages, no chemical fire extinguishers, no ironclads, no perfecting presses. Fully chronieling the inventive progress of the last six decades would make it seem as if nothing of real consequence to man's comfort had been done before 1837.

DANGEROUS CHEMICALS.

The Time Has Arrived to Put Legal Restrictions on Their Sale.

Several more or less dangerous articles of chemical manufacture are becoming so largely employed for a variety of useful purposes now that some that will prevent bilious colic. restrictions as to their sale, conveyance and storage are imperative, says the San Francisco Argenaut. Thousands of gallons of "liquid" carbonic acid gas in steel cylinders under high compression may now be seen every day being conveyed in carts from place to place, and similarly other gases are stored under pressure in "tubes," as, for instance, oxygen, hydrogen, nitrous oxide and so on, all of which may expose the public to danger. Solid bricks of metallic sodium, again (kept under naphtha, of course), are every day carried from port to port as part of a ship's cargo, and very serious accidents have occasionally arisen from the intermixture of various chemicals on board ship by the damaging effect of a rough passage upon the packages. Still another chemical substance of comparatively recent discovery is carbide of calcium, which on simply becoming moist gives off the exceedingly inflammable gas, acetylena, which, with air, forms an explosive mix-

JERSLY'S BLIND HEIRESS. Most Interesting Woman Is Miss Alice A. Holmes.

One of the most interest ng w men maginable is Miss Alice A. Holmes, the heiress. Miss Hoimes has just come into \$500,050 or more, but there is no danger of her marrying any young and ardent lover, for she is now in her seventy-fifth year, says Pennsylvania Grit. Then the old woman is blind and

has been blind ever since she was 14. Recently her brother died in California and left her a big fortune, which she purposes to spend in the amelioration of the sufferings of her fellow-afflicted kind. Miss Holmes lives in a quiet and pretty street in Jersey City, and for 25 years she has struggled through a decent poverty. Her brother in Califorhis has always looked after her wants, but Miss Holmes' pride would not allow him to support her, and she has carned her own living well through the years of her solitude. Early in life she conceived a love for music, and although deprived of her sight she managed to master that difficult art. Once that she became proficient she desired to teach. And, strange to say, she was quite as proficient as a teacher as she was as a performer. She found she could succeed with pupils who had their yes as well as with pupils who had not. And in that way she supported her-self, if not in elegance, at least in com-tort. Now that Miss Holmes has been

rendered independent, she will devote her money to the education of her fellows who are afflicted with blindness. A number of years ago Miss Holmes published a volume of verses that have the true ring of poetry in them .

There is more catarrh in this section of the country than all other diseases put together and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and pre-scribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure or. the market, It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,

CHINESE PREVENTIVE OF RABIES

Eating the Liver of the Dog Recommended as a Cure for the litte.

A French missionary in China witnessed recently how two of his carriers were bitten by a rabid dog and was very much worried about it, says Modern Medicine. Several Chinese who happened to be there told him that his worry was absolutely uncalled for, since they had an undoubtedly safe preventive against the poison of a rabid dog taking effect, and to prove the assertion five Chinamen who had been bitten in March of last year by a mad dog were presented to the missionary. He found that Chinamen eat of the raw liver of a mad dog after being bitten, and if they partake of this within a given time after the accident, it is said they will not be subject to hydrophobia. It is curious that Plinius in his natural history recommends eating the liver of a mad dog. | incidental expenses of travel-berth in if bitten, as raw as possible, and they who could not swallow the liver raw

THE SULTAN'S HEIR.

His Eldest Brother, Who Is Little Known Among the People.

The sultan's heir is not his eldest son by his eldest brother. The eldest male succeeds. Such is the law of Islam, and the fruitful source of dynasty murders in almost every reign since the Turks became a power, says the London Echo. The sultan has four brothers; not one, only, as was lately alleged. This eldest brother is Rechad Effendi; that is to say, he is the eldest after ex-Sultan Murad V., who, being insane, is not counted. The third brother is Waredin, and the fourth Suliman. The sultan's eldest son, Prince Selim, has no earthly chance of succeeding his father. He has too many uncles and uncles' sons for that. But Prince Selim is lucky, if he knows it, for he is not "dangerous." He lives a life of freedom, whereas the heir is, by the custom of the Ottomans, a kind of life prisoner. Rechad Effendi is rarely seen. Every

time he drives out he is escorted by a troop, less by way of an escort than as a guard. The few who do know him like him, for he is said to be a courteous. humane, well-informed man, acquainted with current politics and keenly interested in them. He is a good farmer. The pretty palace known as the Tcher-agan is his residence. Of course, Rechad's visitors are searched before they are admitted, and when they are leaving, by the sultan's officials. During this time of trouble in Armenia, Constantinople and Crete, Rechad has been more narrowly watched than ever, for the sultan and his clique know that Rechad is popular. Unlike the sultan, Rechad is one of the most handsome

men in Constantinople.
