Children especially become very fond of it; and infants do not know when it is added to their food.

Two Pointed Questions Answered.

What is the use of making a better article than your competitor if you cannot get a better price for it?

Ans.—As there is no difference in the price the public will buy only the better, so that while our profits may be smaller on a single sale they will be much greater in the aggregate.

How can you get the public to know your make is the best? If both articles are brought prominently before the public both are certain to be tried and the public will very quickly pass judgment on them and use only the better one.

This explains the large sales on Chamberlain's Cough Remedy. The people have been using it for years and have found that it can always be depended upon. They may occasionally take up with some fashionable novelty put forth with exaggerated claims, but are certain to return to the one remedy that they know to be reliable, and for coughs, colds and croup there is nothing equal to Chamberlain's cough remedy. For sale by H. E. Grice.

It reproduces vocal selections and gives one command of every pleasure that appeals to the sense of hearing. No investment pays such large returns in pleasure. Besides reproducing the musical and other records made for entertainment purposes, the Graphophone will record immediately and reproduce at once and as often as is desired, your own words or song, or any sound. EVER FEEL GRATEFUL. I write in the interest of others, and especially of my brother ministers, who are unable to engage in the great work to which the Lord has called them. My voice was so weak and my throat in such a condition I could not sing, and at times could hardly talk at all; was almost deaf in my left ear and had a continual cough. I used Aerial Medication and within three months my hearing, voice and health were restored, and have remained so for over three years, for which I shall ever feel grateful.

The GRAPHOPHONE

Most fascinating invention of the age. Always ready to entertain. It requires no skill to operate it and reproduces the music of bands, orchestras, vocalists or instrumental soloists. There is nothing like it for an evening's entertainment. Other so-called talking machines reproduce only records of cut-and-dried subjects, specially prepared in a laboratory, but the Graphophone is not limited to such performances. On the Graphophone you can easily make and instantly reproduce records of the voice, or any sound. Thus it constantly awakens new interest and its charm is ever fresh. The reproductions are clear and brilliant.

Graphophones are sold for \$10 and up. Manufactured under the patents of Bell, Tainter, Edison and Gramophones. Our establishment is headquarters of the world for Talking Machines and Talking Machine Supplies. Write for catalogue.
