Not Enough Troops to Hold the Islands --- Volunteers Would Come Home.

MANULA, April 7, via Hong Kong, April 11. (Uncensored)-Though hundreds of Filipinos are daily returning to their homes and are desirous of resuming peaceful pursuits, and though the proclamation issued by the United States Philippine commission has given an impetus to this movement. the war is far from ended. One of the foremost American generals said recently: "We will see 100,000 soldiers in the Philippines before the Amerleans control the islands." A majority of the army are of his opinion.

It is generally considered that great reinforcements are necessary, as the troops here are not sufficient to make the conquest of the island of Luzon and hold the ports occupied. It is thought that it would be cheaper in the long run and have a better effect upon the natives to establish American supremacy effectually and quickly than to temporize with a score of rebellions.

All the stories told by prisoners and friendly natives agree that a majority of the insurgents would be glad to quit, but that there are enough professional revolutionists left to infest the country with bands of hundreds of men and to demoralize business years to come. Some high Americans be-

The dead justice made the formal announcement of his resignation to his colleagues on the bench in a long letter. In part he said:

A new emlaws were those of another countrythe land titles from Spanish and Mexican grants, both of which were often overlaid by the claims of the first settlers. To bring order out of this confusion, Congress passed an act providing for another seat on this bench, with the intention that it should be filled by some one familiar with these conflicting titles and with the mining laws of the coast and as it so happened that I had framed the principal of these laws and was, moreover, chief justice of California, it was the wish of the senators and representatives of that state, as well as those from Oregon, that I should succeed to the new position. At their request Mr. Lincoin sent my name to the Senate and the nomination was unanimously confirmed."

While the plan has been discussed to detail several ships under Rear Admiral Sampson for this duty, it has failed so far to be officially approved. The department has been unable to carry out its plans for the immediate establishment of a European squadron to visit other than English ports, owing, in the first place, to the necessity of dispatching most of the smaller vessels of the North Atlantic squadron to reinforce Dewey's fleet, and in the second place to the desire to avoid a remission of the annual spring and summer maneuvers of the North Atlantic squadron. The extreme importance of these mineuvers was so demonstrated by the results obtained during the Spanish-American war that it is believed to be unwise to omit them for even one season.

#### The Death of John W. Turner, the Union Officer, Occurs in St. Louis.

Foreigners in Manila think the Americans are too optimistic as to the effects of the proclamation. They say that the weakness of the proclama! lies in the fact that the natives have so long dealt with the Spaniards that they are unable to realize what its words mean and that the purport of its promises is anything more than a snare.

A majority of the United States volunteers are eager to return home. "We did not enlist to fight niggers," is a remark that is constantly heard. They consider that there is small glory in guerilla warfare, the dangers and hardships of which cannot be appreciated at home. The volunteers construe their enlistment "to the close of the war," to apply to the war with Spain, and want to be relieved by regulars.

The Spanish system of defending Manila by a line of blockhouses may be adopted by the American authorities here during the wet season, as it requires fewer men than the trench defenses and lessens the chances of sickness among the defenders.
