Nothing is more important for the preservation of good health and clear business judgment than jealous care of the eyes. Defective vision produces irritation and nervousness, and in this condition no person is capable of giving to business matters or to the ordinary affairs of life the attention necessary to success. Perfect fitting glasses will overcome nature's defects. You can have your eyes examined free by

**Strong Endorsements**

Dr. Mary E. Green, president National Household Economics Association, member American Medical Association, member American Public Health Association, author of "Food Products of the World," writes from Charlotte, Mich.: "The excellence of Pabst Malt Extract is not unknown to me, as I have used it professionally for years, always with the most satisfactory results. For mothers nursing their children and for general debility from any cause, I regard it as of especial value, as it combines both tonic and nutrient properties, which make it truly the 'Best' Tonic."  
 "I recently prescribed Pabst Malt Extract. The 'Best' Tonic, to three of my patients, all of whom were ladies, and all of whom were suffering from dyspepsia and its consequences, and in all these cases it acted like a charm. Two of them bought more of the tonic, and continued to take it, until now they tell me they can eat anything, and one of them added 'everything,' without the slightest inconvenience. They have certainly improved wonderfully in weight and strength. I have prescribed your 'Best' Tonic a great number of times. It is one of the best, if not the very best, of its kind."

**Help... Nature**

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

will generally correct this difficulty.  
 If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.
