The attendance at the first encampment of the Association of Spanish War Veterans, held at Washington, was representative rather than numerous, about half of the states being represented.

If the Hebrews of the United States carry out their threat of boycotting French goods of all kinds, because of their belief that Capt. Dreyfus was convicted by a packed court-martial, in spite of evidence of his innocence, they will find a strong friend in Senator Stewart, who advocates what would be a practical official boycott of France by the United States government.

Ex-Senator Washburn, of Minnesota, who has just returned from Europe, and who is regarded as one of the world's best wheat experts, said of this year's grain supply: "The crops throughout Europe are all good this year, with the single exception of Russia. There the wheat yield is poor. In Germany, Austria and Hungary, and, in fact, in all other parts of Europe, the crop is better than it has been for years. This will lessen the demand for bread stuffs from the United States to some extent, but with our short crop here, there will be a good market for all that we have produced. India is as yet hardly a factor in wheat production. Argentine is fast getting to be one. The United States will, however, for a long time to come, be the leading wheat-producing country of the world."

The yield of corn in the United States has exceeded 2,000,000,000 bushels in 1899, 1891, 1895 and 1896. Last year and the year before, the crop came close up to the 2,000,000,000 mark, exceeding in both years 1,900,000,000 bushels. This year, according to accepted estimates, will be another 2,000,000,000 year, that amount being exceeded by 50,000,000 bushels. Nearly three-fourths of the entire crop is credited to the states of Kansas, Nebraska, Iowa, Illinois, Missouri, Indiana, Ohio and Texas, and the yield in bushels will be in the order named, Kansas standing highest with 300,000,000 bushels and Texas lowest with 74,000,000 bushels. Last year Iowa led the list with 255,000,000 bushels, Illinois was second with

200,000,000 bushels, Nebraska third, Missouri fourth, Kansas fifth, Indiana sixth. The total in the United States devoted to corn this season is placed at 81,550,000 acres, making the average yield for the entire country a shade over twenty-five bushels per acre. The yield in Kansas is placed at nearly 33 bushels per acre, in Nebraska a little over 34 bushels, in Iowa not quite 30 bushels, in Missouri a little over 28 bushels, in Indiana almost 31 bushels, in Ohio a little over 31 bushels and in Texas a little over 16 bushels per acre.

What Makes Home?

Home is made by the family. Without the love which comes with children there may be a house but never a home, in the best meaning of the word. Many a house which was only four walls and a roof has been made a home by the agency of Dr. Pierce's Favorite Prescription. Nature sets her face against childlessness and "Favorite Prescription" works with nature to remove the obstacles to maternity.

"I had been a sufferer from uterine trouble for about three years, having two miscarriages in that time and the doctors that I consulted said I would have to go through an operation before I could give birth to children," writes Mrs. Blanche E. Evans, of Parsons, Lusk Co., Pa., Box 41. "When about to give up in despair, I bought a bottle of Dr. Pierce's Favorite Prescription and after taking it felt better than I had for years. Felt improved before I had taken one-half bottle. After taking four and a half bottles I gave birth to a bright baby girl who is now four months old and has not had a day of sickness. She is as bright as can be. I cannot say too much in praise of Dr. Pierce's Favorite Prescription."

Dr. Pierce's Medical Adviser a work for every woman is sent free on receipt of stamps to pay cost of mailing only. Send 21 one-cent stamps for paper covered book or 31 stamps for cloth covered to Dr. R. V. Pierce, Buffalo, N. Y.
