MINER BROS.

Red Cloud, Nebraska.

From Oklahoma.

FOUNTAIN, O. T. July 26, 1900.

EDITOR CHIEF.—Dear Sir:—As it is quite a while since you have heard from this part of the country I will write and tell you how crops are. They are just splendid down here. Corn is too hard for roasting ears and the castor beans are just fine. We have begun to gather ours. Everybody thinks there is going to be lots of sweet potatoes and other garden stuff. Peaches are an immense crop here this year. Three year old trees are bearing. Blackberries and grapes are a splendid crop. All kinds of fruit does well. Mr. Keig has a splendid show for fruit this year. Peaches, plums, apricots, nectarines, grapes and blackberries. Mr. Keig has been to Lebanon, Kansas, on a visit and is on his way home with about six teams coming with them.

There are no homesteads to take here. Some will sell out. Claims can be bought for from \$300 to \$2,000 according to the improvements. Small grain is good. Corn is very good.

Mert Fearn has done splendid. He has about fifteen acres broke and some more grubbed out ready to brake.

Cotton is a very good crop and a good price.

Mr. England's folks were down on a visit and they were all well excepting Mr. England who is quite poorly. They have a nice home and good crops.

We have a real nice school house. It is a frame and we will have three months school this fall beginning the first Monday in October.

Uncle Benny Vanduyke has broke out quite a nice little patch on his place and has some nice melons and pumpkins and is going to move on his place in August. He will be our nearest neighbor.

Uncle Sam Reese from Buffalo creek is doing nicely. He has a nice home about 22 acres broke out on his own and has another farm rented. His crops are all good.

They celebrated free homes at Sealing. Free homes are a great thing for this country.

Our son Leonard is here on a visit. He came on the sad mission of bringing his motherless babe to us to keep for a while.

Died, Mrs. Geneva Guthrie, wife of Leonard Guthrie, at her home at 709 E. 7th street, of typhoid fever. She was 26 years and 2 days old. She leaves a husband and one child to mourn her death. She was a kind and loving wife and mother.

As for myself I am doing as well as a man of my health and age could. It is better than renting. If any of the renters don't believe it let them come and try it. We would like to hear from Line and Occasional every week. We can't do without the Red Cloud Chief. We think more of him than any other Indian.

Captain Archer Visits Superior.

There was a large sized audience at the Methodist church last night to hear one "Captain" Archer lecture on the subject of temperance. At the conclusion of his remarks "Captain" Archer announced that he would lecture during the week on various topics. Early this morning he appeared at the Journal office and wrote the following notice for publication:

"L. G. Archer was obliged to cancel his appointments this week on account of a call to the north part of the state." "Captain" Archer's sudden departure is due to the fact that his record was being investigated by newspaper men, the Journal's editor among them. The Bloomington Echo made things too hot for him in that town, and the Red Cloud Chief exposed him in Red Cloud.

This man Archer makes the claim that he is an officer in an organization known as the Volunteers of America, a charitable organization of the same plan and aims as the Salvation Army. The officers of this organization deny that he has any connection whatever with them. He was run out of Jacksonville, Ill., for having attempted original intimacy with a 14-year-old girl. At Red Cloud it is claimed that he tried to get a young lady to marry him, and it is known that he has a wife in Illinois.

Superior is lucky that "Captain" Ar-

ANOTHER - MASSACRE !

Red Cloud, Nebraska.

cher did not make a longer stay in the town and the people who allowed him to speak last night in the Methodist church are unlucky in that they picked him up without sufficient investigation. —Superior Daily Journal of July 30.

Winter Wheat for Nebraska.

In the fall of 1896 thirty-seven varieties of winter wheat were sown on the Station farm. Of these, all but three varieties killed out so badly that it was not considered worth while to harvest them. The three varieties that lived through were Turkey Red, Big Frame and Currell. In the fall of 1898 there were sown more than a hundred varieties, and only five came through the winter in good condition. Those just mentioned were three of the five. Last fall forty-two varieties were sown, of which seven did not germinate and nineteen winter-killed. The same three varieties were among the best, but the yields have not been ascertained.

In order to test the relative merits of the seed thus selected and that of the same varieties from some other sections of the country, seed of the Turkey Red variety was brought from the Ohio and Iowa Experiment Stations and of the Turkey from Kansas. The latter is very similar to the Turkey Red grown here. Seed of the Currell variety was also obtained from the Maryland Experiment Station. None of these did so well as the Nebraska grown varieties, with the possible exception

of the Kansas Turkey. Contrary to expectations this wheat matured earlier than the Nebraska Turkey Red. It did not lodge and was not badly effected with rust. In these respects it was as good as the Nebraska grown wheat. Both the Ohio and Iowa Turkey Red lodged and rusted badly and matured later than the Nebraska Turkey Red. The Currell from Maryland made a ranker growth than the Nebraska Currell, but lodged and rusted badly.

It is the aim of the Experiment Station to extend the area of winter wheat culture over as large a portion of the state as possible. To this end a very large number of varieties of winter wheat have been tested by the Station during a period of several years. Those strains of Turkey Red and Big Frame varieties that have been grown on the station farm for several years have proven themselves very hardy. Seed wheat of either one of these varieties will be sent out on application, free of cost except transportation charges, as long as the supply lasts, to parties living north of the Platte river and also to those west of the 100th meridian.

T. L. LYON,
Nebraska Experiment Station Lincoln, July 30, 1900.

WHY does the New Home Sewing machine Company sell such vast numbers of machines? Because they make the best machines and fully enforce their warranties.

STATE CREEK.

Rain, rain, plenty of rain. Since the late rains our road superintendents are doing some good work.

Considerable small grain is standing in the field yet not stacked.

Several of our neighbor's boys went south to seek work and stay as if they had good employment.

Elders Finch and Sallee of Red Cloud are holding a very interesting meeting at the Mt. Hope school house this week.

Mt Hope school Dist. No. 78 held their annual meeting last Thursday and voted eleven mills tax for seven months school to commence first Monday in September with Oat Frazier as teacher and with the re-election of Dist. Clerk F. Graham.

Old Mr. Cyrus Francis and wife are visiting in Lincoln county, Kansas.

Since our last big rain we are of the opinion that we will have a half crop of corn.

Rev. Hewitt of Walnut creek filled his regular appointment last Sunday evening at Mt. Hope and delivered the best sermon of his life.

The heaviest rain of the summer fell last Saturday and revives the crops to such an extent that we hardly know that we were threatened with a drought.

Little Dora Corbit who had her arm broken is getting along nicely and will soon have it well.

C. Stevens will build a new residence in the near future. OCCASIONAL.
