

### The Old Tallow Candle. The Old "Specks."

The old tallow candle and the old method of selecting glasses go together.

Both primitive—both best of the times in which they flourished—both are "back numbers."

The man who takes his "specks" from off a case and puts them upon his face without knowing they are right, should step to the other end of the counter and buy a tallow candle to go with them.

If these are too modern, there still remains for him the flint and pine knot.

WE FIT GLASSES TO MODERN EYES BY MODERN METHODS.

# ROYAL BAKING POWDER

No inferior or impure ingredients are used in Royal for the purpose of cheapening its cost; only the most highly refined and healthful. Royal Baking Powder imparts that peculiar sweetness, flavor and delicacy noticed in the finest cake, biscuit, rolls, etc., which expert pastry cooks declare is unobtainable by the use of any other leavening agent.

Alum is used in making cheap baking powders. If you want to know the effect of alum upon the tender linings of the stomach, touch a piece to your tongue. You can raise biscuit with alum baking powder, but at what a cost to health!
