The intelligent compositor, in setting up our poetical tribute to George Washington, last week, saw fit, in the exercise of his fine discrimination, to change "great" to "greater." This was done ostensibly, we suppose, to intensify the language and improve the rhythmic flow of the verse. We suspect however, that the real motive was a dark and sinister design to injure us in the estimation of the CHIEF'S array of readers. The poem in question contained some new matter, never before published and was stated in the extreme strength that the facts would bear. Indeed we are told that some thought our admiration for the man had carried us to the verge of an overstatement of historic fact. Then comes the intelligent compositor with his intensifying business and makes a burlesque of the whole matter. This correspondent is essentially a historian. He is after the truth and aims to give it with the accuracy of an algebraic formula and the fidelity of a photograph. Consequently his productions will not bear intensifying. They are already intense. Truth is intense ever and always. The ulterior purpose of the intelligent compositor is, if possible to induce people to question our veracity. With the calm patience of a seeker after truth, we may endure this for a season,—and we may not. It's a long time since any one was lynched in Blue Hill. We hereby invite the intelligent compositor to come to town.

CANCER

Sufferers from this horrible malady nearly always inherit it—not necessarily from the parents, but may be from some remote ancestor, for Cancer often runs through several generations. This deadly poison may lay dormant in the blood for years, or until you reach middle life, then the first little sore or ulcer makes its appearance—or a swollen gland in the breast, or some other part of the body, gives the first warning.

To cure Cancer thoroughly and permanently all the poisonous virus must be eliminated from the blood—every vestige of it driven out. This S. S. S. does, and is the only medicine that can reach deep-seated, obstinate blood troubles like this. When all the poison has been forced out of the system the Cancer heals, and the disease never returns.

Cancer begins often in a small way, as the following letter from Mrs. Shirer shows:

A small pimple came on my jaw about an inch below the ear on the left side of my face. It gave me no pain or inconvenience, and I should have forgotten about it had it not begun to inflame and itch; it would bleed a little, then scab over, but would not heal. This continued for some time, when my jaw began to swell, becoming very painful. The Cancer began to eat and spread, until it was as large as a half dollar, when I heard of S. S. S. and determined to give it a fair trial, and it was remarkable what a wonderful effect it had from the very beginning; the sore began to heal and after taking a few bottles disappeared entirely. This was two years ago; there are still no signs of the Cancer, and my general health continues good.—Mrs. R. SHIRER, La Plata, Mo.

S. S. S. is the greatest of all blood purifiers, and the only one guaranteed purely vegetable. Send for our free book on Cancer, containing valuable and interesting information about this disease, and write our physicians about your case. We make no charge for medical advice.
