Apparently the heads of some people are given them as a convenient bump on which to do up their hair.

of going on a strike.

It very often happens that the more learned a graduate talks on commence ment day the harder he has to hustle for a job.

According to the scriptures all men are made of dust. We doubt it. Dust would be a general revival in busmen never do.

It is safe to assume that the fellow who said "tomorrow never comes" did not have a note coming due twenty four hours later.

Some of the senatorial candidates Lincoln for the past two months will soon have to close down for repairs.

The first cyclone of the season struck at Wells Point, Texas, on Sunday at thigh noon. The storm did considerable damage and eight people were stilled.

We certainly have some of the most fertile soil in the world. There are numerous cases where widow's weeds and orange blossoms have grown in the same soil.

in the most conspicuous place poss ble has on a big shoe she wouldn't let any their heads that they wanted a cigar the year." one see it for the world.

If the state legislature will just pass a bill prohibiting the running at large of chickens, ducks, geese, turkeys, logs and tom cats, especially the latter, the people will probably forget all about the senatorial squabble.

Signs multiply that the industrial progress of the people of the United States is a disturbing fact in monarchial countries. The superiority, how ever, rests on solid merit and promises to grow more marked every year.

# Mississippi's Great Stone Wall a Puzzle to Archaeo logists.

#### Wonderful and Massive Structure That Has Withstood the Ravages of Many Thousands of Years in Claibourne County.

One of the scientific puzzles of the state of Missouri is the "Brandywine Stone Wall." It has long been a problem that is yet unsolved. Some time ago, says the New Orleans Picayune. Thomas Watson, of Hazelhurst, sent Gov. Longino a pencil drawing of an immense pile of stone in the southeastern portion of Calborne country suggesting that the stone might be utilized in building the new capitol In a letter which accompanied the drawing Mr. Watson stated that these stones, piled high on each other, cover an area four miles square. Each stone

is six feet long, three feet wide and two feet thick, and they are joined together with an excelent quality of cement. No man knows how they came there. They may have been there for thousands of years. The builders, the Jackson News thinks, were some prehistoric race-it could not be otherwise. This structure is supposed to be for. a continuation of the great "Chinese wall." which seems to begin below Raymond, in the southern part of Hinds county, and which is traceable through Copiah. It is broad enough to accom modate two or three wagons abreast. and is one of the wonders of the world.

"Mention of this remarkable exhib-" says the Hazelton Courier, "has elicited no little comment-in fact, has brought a letter to Mr. Watson from the warden of the United States penitentiary at Leavenworth, Kan., and also a letter to Dr. T. B. Birdsong from another distinguished source, it being middle-aged and elderly persons. known that the latter some years ago investigated the matter. Mr. Watson. however," says the Courier "has given the subject more patient thought than anyone else, and to him the Courier is indebted for the following interesting facts:

"He calls it the 'Brandywine Stone Wall,' and says this wonderful and massive structure or parts of structure of masonry done in stone, which has withstood the ravages of time for perhaps many thousands of years, still stands an enduring relic of a prehistoric civilization and a knowledge of the art of building not inferior in Highly medicinal and scientific. many respects to the present day. These stone buildings lie, for the most part, buried in the earth in the southeastern part of Claiborne county, and lying against the Copiah county line. on the slopes overlooking the valley of the Brandywine creek from the west side.

"These walls run from northeast to southwest. They are built of white or gravish white stone of immense size. weighing from two to three tons, measuring from six to eight feet in length and three feet wide by two feet thick. These blocks, or slabs, are laid in a very fine quality of cement, and as perfectly as brick work. The joints are perfect and very close.

"At one place the top of the wall is exposed by the earth being washed away to a width of 60 feet and a length of 90 feet; this exposure has the appearance of a brick hearth. At an-

lie. And he tells it, too.

As a rule, the church going period in every man's life extends no longer than three or four years. He goes through it the same as a period when he is crazy to dance, and another season when he dreams night and day of politics.

One of our young lady correspondents wishes a ;recipe for removing paint. A good thick soap lather applied to the skin with a coarse rag or a turkish towel will generally remove it. If this fails rub your face on your best fellow's bosom and let him use the soap suds.

Some of our young men have lots of nerve. They are always ready to escort a young lady to church or any other place where there is no admission fee, but as soon as it comes to dollars and cents they have something else to do.

Enemies are often more profitable than friends, and of more use to us. Friends will fistter you, and tell you a whole bunch of good things about yourself. Your enemies will tell you the truth, and then you can strengthen your skirmish line and prepare to do battle with them.

All the presents given at a wedding belong to the bride. The groom is supposed to have all he wants on earth when he gets the bride. However, as a rule, the groom does not know this until after the first reception or ; party when his wife shows the guests what "she" got for wedding presents.

The bubonic plague exists to an alarming extent in San Francisco and stringent measures have been taken to prevent the spread of the disease. The state authorities in California have maintained that the disease has not appeared there at all, but the authorities at Washington after investigation have found that it exists to an alarming extent.

Did you ever notice the difference in the way in which a lady and a gentleman mounts a wheel? The former will stop, adjust her skirts, put one foot on the pedal, gives a little spring, settles lightly upon the saddle and away she goes. < man grabs the handle bars, stipation.

together. The club also takes a whirl day and many vacancies will be no. at the country roads. Every now and ticed among the feminine portion of then they get hold of a scraper and go the church congregations on this acout in the country, entist the farmers count .-- Church services can wait, but and put in a few days improving the this necessary duty must be performed roads which lead to town."

The Emporia (Kau.) Gazette gets in a few potent pointers to the business men of that town as follows: "The mail order houses and large city stores admit of no dull season in their advertising departments and business rooms. During January, February and March they send cut catalogues and muca other well prepared printed matter and

# Deafness Cannot be Cured

by local application as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is a flamed you have a rumbling sound or imperfect hearing, and it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases ont of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give one hundred dollars for any case of Deafness (caused by cat. an inproved individual plantation in bears out the theory advanced by Mr. arrh) that cannot be cured by Hall's Watson. Truly, there is work for the Catarrh Cure. Send for circulars, free.
