"Whilst our husbands and brothers are examples of patriotism." she would say to her country women, "we must be patterns of industry." She did not hesitate to wear a brown dress and a speckled apron when receiving fasidious and elegant visitors at Morristown. It was said afterward that she acquired her inveterate habit of knitting in her zeal at Valley Forge to relieve the barefooted men around her. On every fair day she might be seen walking through the rude streets of the town of huts with a basket in her hand. Entering the hut of a sergeant, she found him dying on a pallet of straw, his wife beside him in the anguish of final separation. She ministered to his comfort with food premistake to be paid for in pain and suffering. pared by her own hands. "Jack" Wilson, whose tomb is in the Little Cloisters at Westminster Abbey. was Shakespeare's tenor. He died at the age of 75 in 1673. The inscription on his tomb at the abbey was much obliterated, and under the direction of an antiquary a man was employed to recut the letters. The antiquary stood looking over him, so that he should make no mistake, and to make the time go pleasantly he dwelt at great length to the workman upon the grandeur and merits of the deceased. The man eventually stopped his work, and, looking up at the antiquary, said: "I wish, sir, that we had known that he was such a swell afore we run that there drain pipe through him!"

An Ingenious Ad.

A speculative Scotch gentleman wanted to dispose of some bees, so to attract purchasers he printed the following: "Extensive sale of live stock, comprising not less than 140,000 head, with an unlimited right to pasturage." The ingenious trick succeeded to admiration, for his stock brought "high prices."

These are days of records and of the beating of records. Benson's Porous Plaster, for quickness of action and thoroughness of cure, has no records to beat except its own. Benson's Plaster, always the best, always the leader, is to-day better than ever. It sticks to the skin but never sticks in its tracks. It marches on.

The people not only want to be cured but cared quickly-and Benson's Plaster does it. Coughs, colds, lumbago, asthma, bronchitis, liver and kidney complaints, and other ills approachable by an external remedy, yield to Benson's as ice does to heat. Neither Belladonna, Strengthening or Capsicum plasters are to be compared with Benson's. People who have once tested the merits of Benson's Plaster have no use for any other external remedy.

The report is abroad that there are tifty cases of smallpox in this city and a great many people do not come here to trade on account of the report and wish right here to brand the same as a fake pure and simple. There is not a case of small pox in this city and there has not been. There were four cases of chicken pox and of a very light form. All who were sick are now able to be about and in fact have not been very sick at all. It is a mistake. Don't be afraid to come here to trade. Our schools are not closed, and public meetings are not probibite i, which alone goes to show that the authorities

are fully satisfied that there is not a small pox case in our midsi .-- Bladen Enterprise.

TEN VALUABLE CLAIMS OF TWENTY ACRES EACH IN THE FAMOUS NOME MINING DISTRICT OF ALASKA.

These are all placer mines and the gold is obtained by "sluicing" or washing it out of the sand. This was the method used by the early California miners, when such immense fortunes were mada.

Our claims are situated on or near such well known gold producing creeks as Anvil, Glacier, Dexter, Dry, and Oregon, and others where in the paat two years immense quantitied of gold have been taken out. Gold was first fount at Nome on Anvil creek in the fall of 1808, by Peter Linderberg, a Norwegian. He then wasted out over \$1,700.00 in six days L tter this claim yielded \$14,000 in one week. Last season it produced over \$500,000 worth of gold. We own a fuil claim of twenty acres only a short distance further down Anvil creek. One man on Dexter creek rocked out \$240 in two hours. Another in the same stream averaged over \$100 a day last summer. Four men shoveling and rock-ing on Glacier creek in two weeks washed out \$27,000. These are but a few instances but the heavy receipts of gold from Nome by the U. S. Assay office fully proves that it is the richest gold camp in the world.

One company whose claim is about one mile above one of ours sold stock two years ago at one dollar a share. The same stock now is worth \$5000 per share. The stock of the Pioneer Mining Co. and the Wild Goose Co. stock is owned by parties who will not even put a price on it. Our claims are in the same localities and there is no reason why ou claims, when developed, will not prove just as rich or richer. The president of our company has spent two seasons in the Nome district prospecting and localing the claims now owned by this com-pany. His early arrival there enabled him to secure the choice of location. In May he will return to Nome taking the necessary machinery to develop and operate our claims.

The greater part of our \$100,000 stort has been taken but there still is some that can be bought. The directors have decided to offer a certain number of shares for sale to the public at par for
