Mr. McMillan will handle, in connection with his bowling alley, a complete line of cigars and tobacco, part of which stock has already arrived.

It will require several days' work to get the railroad track between Lester and Cowles in shape to allow trains to run over it, owing to the number of washouts between those places. The fact of the railroad embankment just north of the Amboy Milling Company's dam on Elm creek giving way was probably the saving of the mill. Even then it was found advisable to cut the race and allow the water to escape in that manner. We learn that the milling company's loss will be about \$300, they having lost a few pigs and fat hogs besides the other damage done by the high water. It is estimated that Elm creek was about three feet higher than ever known before.
