It is said that one of the teachers in the high school has threatened a boy pupil that she will cause him to fail to "pass," and in pursuance of her object has begun to give him lower markings than other pupils who have learned their lessons no better, if so well, as he has. Teachers who vent their spite upon pupils in this manner seldom last long anywhere. There is too much of this kind of work going on in the Red Cloud schools and a stop should be put to it. As a sample of the teacher's plan, it is said that one day this week the teacher gave the boy a grade of 43 in one of his studies. Another boy's lesson, which was copied almost entirely from that of the first mentioned and did not contain the answers so fully, was graded above 80. It seems that we have something beside discrimination in railroad rates to contend with.
