The Difference in Cost

between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cause doctors' bills many times this.

Dr. PRICE'S cream Baking Powder

is the most economical in the end, because it goes further in leavening and insures perfect, wholesome food.

When ordering of the grocer always call for Dr. Price's Cream Baking Powder by name for good health and good food. It makes the finest cake, puddings, flapjacks, biscuits and bread.

NOTE.—There are many imitation baking powders which are sold from five cents to twenty-five cents a pound. They should be carefully avoided as they are made from alum and are unhealthful.
