# DR. PRICE'S Cream Baking Powder

## A PURE, WHOLESOME, RELIABLE CREAM OF TARTAR BAKING POWDER

Its superiority is unquestioned

Its fame world-wide

Its use a protection and a guarantee  
against alum food

Cream of tartar is derived from grapes. It is used in Dr. Price's Baking Powder in the exact form and composition in which it occurs in that luscious, healthful fruit. A pound of rich, ripe grapes contains a quantity of cream of tartar equivalent to that required to make baking powder sufficient to raise a dozen ordinary-sized hot tea biscuit. The healthfulness of Dr. Price's Cream Baking Powder is beyond question.

## Alum Baking Powders are Condemned by Physicians

Fifty-two different brands of alum and alum-phosphate baking powders were recently analyzed by an official chemist. In every one of these fifty-two different brands sulphuric acid was reported in large quantities, frequently greater than twenty-five per cent of the whole weight of the baking powder!

Chemical tests show that a portion of the alum from alum baking powder remains as such and unaltered in the bread.

Alum baking powders are extravagant. They cost but two cents a pound to make, yet they are sold at twenty-five cents a pound, or twenty-five ounces for twenty-five cents.

But, can the housewife afford, no matter at what price, to use a baking powder which puts alum and sulphuric acid in her food?
