NATURE'S NOBLEMEN.

Those Who Are Ambitious to Be Useful Rather Than Rich.

A young man of ability and great promise recently refused to enter a vocation which would yield him a large income, lest the temptation to become rich might eat up his desire to help his fellow men. He feared that the frantic struggle for wealth and self being waged by the majority of men with whom his position would force him to associate would insensibly draw him into the same vortex of selfishness. He felt that his ideals would become tarnished, that his aspirations would be starved in such an atmosphere, and so he chose a vocation which would enable him to render the greatest service to humanity.

It is a refreshing thing in a material age to see people who are ambitious to be useful rather than rich, who are more eager to help others than to make money. These are nature's noblemen; these are the characters which enrich life and which have pushed civilization up from the savage to the Florence Nightingales and the Lincolns.

One of the most promising things about our civilization today is that, side by side with the greed for gold, is the ever growing passion of humanity for good. The number of people who prefer to be useful to their fellow men rather than to make money is constantly increasing. This passion for good is the salt of humanity; it is what makes us believe in the future of the race.—Success.

ARTISTIC TEMPERAMENT.

Defined as a Disease That Affects Artists.

Gilbert K. Chesterton's "Heretics" contains some of his keenest and most amusing writing. Of great men he observes: "The first rate great man is equal with other men, like Shakespeare. The second rate great man is on his knees to other men, like Whitman. The third rate great man is superior to other men, like Whistler." In the fol-

Let Common Sense Decide

Do you honestly believe, that coffee sold loose (in bulk), exposed to dust, germs and insects, passing through many hands (some of them not over-clean), "blended," you don't know how or by whom, is fit for your use? Of course you don't. But

LION COFFEE

is another story. The green berries, selected by keen judges at the plantation, are skillfully roasted at our factories, where precautions you would not dream of are taken to secure perfect cleanliness, flavor, strength and uniformity.

From the time the coffee leaves the factory no hand touches it till it is opened in your kitchen.

This has made LION COFFEE the LEADER OF ALL PACKAGE COFFEES.

Millions of American Homes welcome LION COFFEE daily. There is no stronger proof of merit than continued and increasing popularity. "Quality survives all opposition."

lowing there may be discovered as much truth as humor:

"The artistic temperament is a disease that afflicts amateurs. It is a disease which arises from a most insufficient power of expression to utter and get rid of the element of art in their being. It is healthful to every man to utter the art within him; it is essential to every sane man to get rid of the art within him at all costs. Artists of a large and wholesome vitality get rid of their art easily, but in artists of less force the thing becomes a pressure and produces a definite pain, which is called the artistic temperament. Thus very great artists are able to be ordinary men—men like Shakespeare or Browning. There are many real tragedies of the artistic temperament, tragedies of vanity or violence or fear, but the great tragedy of the artistic temperament is that it cannot produce any art.

THE BRIDES OF VENICE.

An Ancient Custom That Once Had a Rude Interruption.

In the year 902, according to old custom, all the brides for the year at Venice assembled on St. Mary's eve at the cathedral, taking with them their dowries in small chests. There they awaited their bridegrooms, who followed them, and after mass they were married and received the bishop's blessing.

In this year the sea rovers of Trieste burst in upon the expectant maidens, who were all dressed in white, with hair loosely flowing and interwoven with threads of gold, carried them off to their barks and hoisted sail.

The doge of Venice summoned his men to arms, pursued the rovers, overtook them in a creek still known as the Port of the Damsels and brought the brides back in triumph.

In memory of this event a solemn procession of twelve young women took place yearly, and the Marian games were observed with great splendor until the year 1379, when they were discontinued in a time of disastrous war.—London Standard.

Jefferson Identified Him.

Laurence Hutton, the author, once stopped at the Touraine hotel in Boston on his way from Bar Harbor to New York, and, being short of funds after his summer outing, the hotel clerk required identification before assigning him a suit of rooms.

Mr. Hutton looked around the lobby and noticed Joe Jefferson, to whom he confided his predicament. Mr. Jefferson went to the desk and, slapping Mr. Hutton on the back, remarked to the clerk, "I don't know who Laurence claims to be, but he's the boy." He was given the pick of the house.

His Wife's Will.

"What makes Peck look so worried?"
"He's been contesting his wife's will."
"Why, I didn't know his wife was dead."
"That's just it; she isn't."—Cleveland Leader.

The Food Value of a Soda Cracker

You have heard that some foods furnish fat, other foods make muscle, and still others are tissue building and heat forming.

You know that most foods have one or more of these elements, but do you know that no food contains them all in such properly balanced proportions as a good soda cracker?

The United States Government report shows that soda crackers contain less water, are richer in the muscle and fat elements, and have a much higher per cent of the tissue building and heat forming properties than any article of food made from flour.

That is why **Uneda Biscuit** should form an important part of every meal. They represent the superlative of the soda cracker, all their goodness and nourishment being brought from the oven to you in a package that is proof against air, moisture and dust—the price being too small to mention.
