THE BLIND OF CAIRO.

To Be Found Everywhere In the Shops and on the Streets.

The first thing that impresses the stranger in Cairo is the number of blind—men, women and children—to be found everywhere in the shops and on the streets. Ophthalmia is very prevalent throughout Egypt. Because of superstition concerning "the evil eye" the native mothers of the middle or the lower class do not wash the eyes of their babies at all. Watching the flies buzzing unheeded around and upon these blind children, a stranger hastens to buy a fly whisk. These are for sale everywhere and are quite attractive with their ornaments of fancy beads and palm leaf fiber. Blind beggars greet one at every corner. Even in the high class Egyptian families there are many blind. The lower classes of Egyptians are given much to hasheesh—that is, the lower classes in the large cities—and, although it is against the law to sell it, one will have the hasheesh places pointed out, and the men who smoke the drug are seen everywhere. They are distinguished by the peculiar appearance of their eyes, which become red, swollen and baggy underneath, and by the peculiar color of the skin, which resembles somewhat the skin of a Chinese opium smoker.—Harriet Quimby in Leslie's Weekly.

A LOST CONTRACT.

The Little Thing That May Sometimes Prevent a Sale.

A pen once lost me an order. I had just worked up the executive of a large concern into a desire to buy. I had my contract form lying on his desk with my finger on the dotted line. He reached over toward his pen rack, took off a pen and plunged it into the ink well. He turned to me with a frown on his face—the well was empty. I was ready with a fountain pen. The pen was uncapped. I handed it to him. He started to write. The ink would not flow. I took it and shook it. Again he made the attempt, with no result.

"I will get one," he said. So he stepped into the other room. Evidently some one stopped him with a question, for he did not come back for three minutes. Then he stood at his desk. He looked down at the contract.

"I believe I had better think this matter over again," he said. And all the talk I put up could not budge him.

I had lost a sale because my fountain pen was empty. Now, one of my regular morning duties, week in and week out, just as regular as my shave and my checking over of calls to be made and the making out of my expense account, is filling my fountain pen.—James N. Bowen in System.

A Great Polyglot.

Solomon Caesar Malan habitually conversed with his children in Latin, but on his deathbed, when Solomon, his son, began to recite a psalm in the familiar Vulgate of his youth, the dying man, scholar to the last, muttered, "Non ita, non ita! Hebraice!" so the son repeated it in Hebrew.

He could, for that matter, just as well have said it in Coptic or Chinese, for to him all tongues came naturally. At eighteen he could write in thirteen languages, oriental and European, and among his published works we find translations from the Arabic, Persian, Syriac, Ethiopic, Hebrew, Coptic, Armenian, Georgian, Mongol, Chinese, Korean, Japanese, Greek, Russian, Welsh and Gothic. He is said to have learned to speak Armenian fluently in a fortnight, and he preached in Georgian to a Georgian congregation in the Cathedral of Kutais.—London Saturday Review.
