

Does Not Color Hair

Ayer's Hair Vigor, as now made from our new improved formula, does not stain or color the hair even to the slightest degree. Gray hair, white hair, blonde hair is not made a shade darker. But it certainly does stop falling hair. No question about that.

It does not change the color of the hair.
Formula with each bottle
Show it to your doctor
Ask him about it, then do as he says

Ayer's
We find, we believe it will stop every case of falling hair unless there is some very unusual complication, something greatly affecting the general health. Then you should consult your physician. Also ask him about the new Ayer's Hair Vigor.
—Made by the J. C. Ayer Co., Lowell, Mass.—

ANNOUNCEMENTS.

To the voters of the Tenth Judicial District:

I hereby announce myself a candidate at the Primaries to be held September 3, 1907, for the Republican nomination for the office of Judge of the Tenth Judicial District of Nebraska, comprising the counties of Webster, Franklin, Harlan, Adams, Kearney and Phelps. Respectfully submitted,
E. U. OVERMAN.

I hereby announce myself as a candidate for the nomination of Judge of the Tenth judicial district, on the Republican ticket, subject to the will of the Republican voters, at the primary election to be held September 3, 1907.
Hastings, Neb. J. W. JAMES.

The Chief is authorized to announce that William C. Dorsey, of Bloomington, Franklin county, is a candidate for district judge, subject to the will of the Republican voters of the Tenth judicial district, at the primary election to be held September 3, 1907.

To the Voters of Webster County:
I hereby announce myself a candidate for the Republican nomination for County Clerk of Webster County, Nebraska, subject to the primary election to be held September 3, 1907.
E. W. ROSS.

To the Voters of Webster County:
I hereby announce myself as a candidate for the Republican nomination for the office of county clerk of Webster county, subject to the decision of the primaries to be held September 3.
V. B. FULTON.

To the Voters of Webster County:
I hereby announce myself a candidate for the Republican nomination for County Clerk of Webster county, subject to the primary election to be held September 3, 1907.
JOHN J. GARBER.

To the Voters of Webster County:
I hereby announce myself a candidate for the nomination of county commissioner from the Third district, subject to the will of the Republican voters at the primary election to be held September 3.
GEORGE W. HUMMEL.

To the Voters of Webster County:
I am a candidate for the office of county assessor, subject to the pleasure of the Republican voters at the primary election to be held September 3.
HENRY C. SCOTT.

I hereby announce myself as a candidate for the office of Clerk of the District Court, subject to the decision of the Independent voters at the primary to be held September 3, 1907.
GEORGE W. HUTCHINSON.

To the voters of Webster County:
I hereby announce myself a candidate for the Republican nomination for county assessor, subject to the primary election to be held September 3, 1907.
GEORGE P. CATHIEP.

I hereby announce myself a candidate for the nomination to the office of county judge of Webster county, subject to the will of the fusion voters at the primary election to be held September 3.
L. W. EDSON.

I hereby announce myself a candidate for re-election to the office of county commissioner from the third district, subject to the pleasure of the Republican voters at the primary election to be held September 3.
H. G. SAWYER.

I hereby announce myself a candidate for the nomination of judge for the tenth judicial district of Nebraska, on the Republican ticket, subject to the decision of the voters at the primary election to be held September 3.
Minden, Neb. L. W. HAGUE.

I hereby announce myself a candidate for renomination to the office of sheriff of Webster county, on the Republican ticket, subject to the primary election to be held September 3.
O. D. HEDGE.

I desire to announce my candidacy for renomination to the office of treasurer of Webster county, on the Republican ticket, at the primary election to be held September 3.
W. C. FRAHM.

I am a candidate for re-election to the office of superintendent of public instruction, on the Republican ticket, subject to the will of the voters at the primary election to be held September 3.
NELLIE WEST CASTER.

STILLWATER

We need rain, but the corn in this section is holding out wonderfully.

Mrs. Cook and her three daughters, Edna, Alpha and Anna, are visiting relatives in Ohio.

James and Robert Greenhalgh and William Cling have recently shelled their last year's crop of corn.

J. H. Richardson gave his brother-in-law, E. C. Christy, a team of horses to use. Mr. Christy sold his team for a neat sum in the early part of the summer.

An auto passed through this community last Sunday evening. One seldom comes this way.

Otto and Emma Knigge are visiting relatives in Maryville, Mo.

Rev. Priestly preached on a very interesting text last Sunday evening: "The Time Is Not Yet".

William Finney recently tore down the house and grana which was on the farm that he bought last spring and built two grain bins on nearer level ground for the accommodation of the renters.

Notice.

All persons wishing to enter any horses, cattle, sheep, hogs or poultry at the county fair at Bladen, must make application to the secretary, D. S. Phelps, at Bladen, not later than September 1, and send stall and pen fees, as the association must know this in order to know how much more to build, as nearly all built are taken.

AN IMPLOSION.

It is the Opposite of an Explosion and Less Familiar.

Every one knows what an explosion is, but its opposite, an implosion, is less familiar. At great depths in the sea the conditions are favorable for its production. At 2,500 fathoms the pressure is, roughly speaking, two and a half tons to the square inch—that is to say, several times greater than the pressure exerted by the steam upon the piston of a powerful engine.

An interesting experiment to illustrate the enormous force of this deep sea pressure was made on the Albatross, a government vessel engaged in deep sea exploration.

A thick glass tube several inches in length full of air was hermetically sealed at both ends. This was wrapped in flannel and placed in one of the wide copper cylinders used to protect deep sea thermometers when they are sent down with the sounding apparatus. The copper cylinder had holes bored in it, so that the water had free access inside, round the glass. The case was then sent down to a depth of 2,000 fathoms and drawn up again.

It was found that the cylinder was bulged and bent inward, just as if it had been crumpled inward by being violently squeezed. The glass tube itself, within its flannel wrapper, was reduced to a fine powder, almost like snow. The glass tube, it would seem, as it slowly descended, held out long against the pressure, but at last suddenly gave way and was crushed by the violence of the action to a fine powder.

This process, exactly the reverse of an explosion, is termed an implosion. —Chicago Record-Herald.

MASTERY OF THE NILE.

The Method by Which the Flow of Water is Controlled.

Every morning from a little room of a great white house on the eastern shore of the Nile at Assouan is clicked by telegraph to Cairo the question: "How much water?" The answer comes so many thousand gallons more or so many thousand gallons less. A button is pressed, the water which flows under the iron bridge at Cairo is increased or diminished some ten days later in accordance with the telegraphic answer, and the intervening valley between Assouan and Cairo has a little more or a little less water on its surface. The man at the button may bring joy or sorrow to thousands of little farms—it is all according to the message he receives.

From the great white house there extends across the river a granite wall or dam 150 feet high. Halfway up this wall and stretching its entire length a line of shutters opens or closes by a pressure of the button. In the winter months a huge lake expands to the southward, which has every appearance of being a flood, for in certain places the tops of palm trees are discernible above its surface, and the summits of inundated ruins apparently mark the sites of sunken cities. As the days go by and Cairo demands more and more water the palm trees and the ruins seem to rise from their watery beds until in June and early July the river flows freely with all its historic indolence.—New York Times.

Three Layers of Atmosphere.

It appears that in the atmosphere there are three distinct currents of air, the first lying at an elevation of from 900 to 1,500 meters, the second at from 2,500 to 4,000 meters and the upper one at from 6,000 to 8,000 meters above the surface of the earth. These are to an extent separate currents, flowing each with its own velocity. At the bottom of each of the layers the stratus clouds are formed, and at the top of each of the layers occur the cumulus clouds. This suggests that the stratus originate at the bottom of a moving current and the cumulus at the top. It is probable, then, that the stratus owe their origin to the difference in velocity and temperature of the two layers, while the cumulus are formed by ascending currents within the layer of air.

Snake Myths.

Snakes have no medicinal qualities, and the following popular notions are myths: That galls of snakes are an antidote for snake bites; that their oil is good for rheumatism, baldness and deafness; that wearing their skins will cure rheumatism or stiffness; that a snake heart, oil or blood is good for consumption or other ills; that snake flesh should be eaten for blood disorders; that a second bite of the snake in the same place will cure or counteract the first bite; that rattlers of snakes are charms.

The Modern Restlessness.

Like the Athenians of old, most people are vainly searching for some new thing, only to look upon it when they find it with suspicion. Of the vast majority it is as true today as it was first written—

They eat, they drink, they sleep, they grieve.
They go to church on Sunday.
And many are afraid of God.
And more of Mrs. Grundy.

—London Ladies' Field.

Some time ago, through a misunderstanding, we stated that Martin Meents had received a gasoline engine. However, at the time of his purchase, he

he has since received a three and one-half horse power stationary engine. It didn't have wheels on, but Martin just put some on.
