### Coursing Meet at Minden.

The national coursing meet for 1907, which takes place in the two weeks beginning October 15, will be held at Minden, Neb., the executive committee of the national coursing association having agreed to award it to that city. The decision was reached yesterday after bids from several places in Nebraska and Kansas had been received asking for the meet. The committee did not act entirely on the size of the bids, but took into consideration the good of the association. It was decided that Minden would be the best place to hold the meet this year, and that in future years it will be passed around among the towns and cities that desire it.

The meet this year will be the best, it is believed in the history of the organization. The entries are large, and include a large number of very high class dogs. There are already 170 entries in the American futurity, the big event of the meet. This event is worth over \$3,000, and will require a week to be completed. In the week following the futurity there will be run the national cup stake and the derby. The purses for the two weeks will aggregate over \$6,000.

George Dayton, of Lincoln, Neb., who is secretary of the futurity event, received the bids of the different places desiring the meet. Kearney was a prominent bidder, and it is not unlikely that the meet will go there next year.

An old soldier writes about ARIOSOSA Coffee: "Your coffee is the best and richest coffee I ever drank since I left the service, from '61 until I received your coffee yesterday." A soldier knows coffee by the taste, and the way it makes him feel, and would sooner go without his bread than without his coffee. Arbuckles' ARIOSOSA was the first roasted, packaged coffee, packaged for

protection of consumers, roasted and the pores of each berry sealed with a coating of fresh eggs and pure sugar, to hold the goodness in and make the coffee settle clear and quickly. Better than "fresh roast." Warming a little develops the flavor and makes the grinding easy. Our enormous coffee business, exceeding the next four largest firms in the world together, reduces our

average cost per pound, and enables us to give you better coffee for your money than you can buy in any other way. There are more packages of ARIOSOSA sold in the United States than all the other Coffee packages combined.
