The new Spence building, on the west side of Main street, is nearing

PANHANDLE, TEXAS.

We are still on the road for the PANHANDLE COUNTRY with parties who are buying land and if you are in position to make a small payment on a farm, and easy payments on the balance, come to our office and talk such a proposition over with us, and we are sure that you will agree with us that we have "the chance of your life" to offer you.

Nice smooth land, shallow wells of good soft water, a deep rich soil, the most healthful place to live in the wide world, populated with the best class of citizens that can be found anywhere, produces all of the cereals that grow in any rainbelt, with a rainfall of an average of twenty-four inches per year, with \$5.00 of school money to each child of school age against \$1.35 average for other states, with a state where you can get a good school house built and a teacher hired as soon as you have seven children of school age in the district—a country destined to be one of the best fruit sections in the United States, where winters are mild and you can work the whole year around and where the burdens of life are made easy.

One of our Company is there now with two of our citizens to show them the country and to sell the land, and we have the promise of a large lot of men for our next excursion which goes by special car on January 21, 1908.

Mr. Howard Brown has just returned from the Panhandle where he purchased 320 acres of land and is well satisfied with the country. The last excursion that we were on had one hundred and forty people on it and one hundred and twenty-eight bought land in the Panhandle.

We are looking for you to come to our office any day to talk this over so you can make arrangements to go with us on our next trip when you can have "the time of your life."
