Dr. E. B. McCarl, who for several months last summer practiced medicine in Riverton and vicinity, has returned to locate permanently.

Who is the man that should remove the mud and water from the crossings? If there is no responsible party, we would suggest that the ladies practice with stilts.

We now have six miles of fine road north from this place, put in ship shape with a King drag which was used by Andy Hackett and Holly Benson. Shame on you farmers living along that line for allowing to men to keep the road in shape by your farms.

If this be true, and the judge should put his belief into practice some of us long haired gentlemen who are so strongly in favor of "personal liberty" and do as we please about this thing and that, will be inclined to hunt tall timber at certain seasons of the year.

Some impecunious scoundrel or scoundrels have of late become too light fingered altogether and they will better have a care or they will be making a berth for themselves in the penitentiary before they know it. They broke into the Staub clothing store not long ago and stole therefrom six pairs of trousers which were later found under a hay stack on the fair ground. It is also thought some foot wear was abstracted from the W. H. Lohr shoe store.

About \$250 was raised, and Monday night Sheriff Helfenstine departed with him for Kansas City. Mr. Neal has been a constant user of morphine for the past thirteen years and while it is a difficult habit to cure, it is hoped that the institute will straighten him out. He took another notion Sunday night that he wanted to finish himself and sharpened up a couple of knives with which to do the work, but the good wife got them away from him before he did himself any harm. It is a sad case.

Why Don't You Have That Child's Eyes Tested?

It costs you nothing and it may save your child from blindness. Many cases of sick headache and nervous diseases are caused by defective eyes. In school children permanent injury to the individual's health is often done by making the children use their defective eyes in close work at school. A few dollars invested in glasses now may mean perfect vision and health for your child in the years to come or a few dollars saved may mean poor vision, perhaps blindness and perhaps permanent injury to the health.

If you have a child that complains of headache, objects blurring the reading and running together, eyes feeling dry and a burning sensation after a short time at study, you may depend upon it that child is in need of glasses and you are falling short of your full duty if you do not at once have an examination made of their eyes.

We are prepared at all times to make an examination and give you honest advice we tell you frankly whether it is glasses or something else that is needed. If it is glasses we can make a correct fit.

It is the duty you owe to your children to see that their eyes are in proper condition. It should be attended to at once. We are licensed optometrists.
