

The Family Physician

The best medicines in the world cannot take the place of the family physician. Consult him early when taken ill. If the trouble is with your throat, bronchial tubes, or lungs, ask him about taking Ayer's Cherry Pectoral. Then take it or not, as he says.

Bilious attacks, sick-headaches, indigestion, constipation, dizzy spells—these are some of the results of an inactive liver. Ask your doctor if he endorses Ayer's Pills in these cases. The dose is small, one pill at bedtime.

Made by the J. C. Ayer Co., Lowell, Mass.

Electricity in Church Edifices.

Few realize what an important part electricity plays in the work about the modern church edifices. There is considerable work constantly required about a church building and the clean, noiseless, efficient and economical electric motors do this work better than any other power in the world. The great pipe organs use motor power for the air compressors; the ventilating fans are motor-driven; the carpets are swept with vacuum cleaners; the building is lighted with hundreds of electric lights.

The new First Baptist church of Worcester, Mass., is electrically throughout. The lighting of this large building has been worked out on scientific principles and the incandescent lamps have been artistically arranged for effects which could be produced with no other kind of illuminant. No sharp or direct rays of light fall upon the eye from any position.

Five motors, aggregating 30 h. p. do the work about this church. The largest motor, ten horse power, drives a fan in connection with the heating system and assures an even temperature throughout the large auditorium. The organ blower is operated by an eight horse-power motor and a fan for the ventilation of laboratories is driven by a four horse-power motor. The installation of a vacuum cleaning system, driven by a four horse-power motor, makes it unnecessary to use brooms or sweepers to keep the building clean. The cost of cleaning has thus been greatly reduced in comparison with the old methods of doing the work by hand.

Another interesting motor application of a wood, canvas and asbestos curtain between the main auditorium and Sunday-school room. This curtain is about thirty-five feet wide and thirty feet high, weighing about three tons. The motor will raise this curtain noiselessly in less than half a minute. The motor installations require little attention and the church is in no way injured, even in appearance, by these five applications of electric power.—Electric News Service.

RHEUMATISM CURED IN A DAY.

Dr. Detchons Relief for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits, 75 cents and \$1. Sold by H. E. Guice druggist, Red Cloud.

Mrs. Walcott and Mrs. Harill, mother and sister of Mrs. E. B. Goble, who have been visiting here, left Tuesday morning for St. Louis.

THE HOT SPRINGS DOCTORS.

Who They Are and What They Will Do.

Since the announcement has been made in these columns that Dr. Ben W. Kinsey, chief of staff of the Hot Springs doctors who have their Nebraska State Institute located at Lincoln, intends to make a two-day visit to Red Cloud on March 23 and 24, during which he will stop at the Hotel Royal where he will receive patients, the question has been many times asked, "Who are the Hot Springs doctors and what do they do?" The answer is this, The Hot Springs doctors are an association of specialists who treat chronic diseases by the Hot Springs system of treatment. They have already established institutes in many of the larger cities of the United States. The Nebraska State Institute is located at 14th and O streets, Lincoln.

The object is to bring this Hot Springs System treatment within the reach of all. The Hot Springs system of treatment for chronic diseases has a national reputation as is evidenced by the fact that the United States government has established its army and navy hospitals at Hot Springs, Ark., where soldiers and sailors are sent after all ordinary methods have failed to cure. Thousands of sick people are carried to Hot Springs every year. Many people who go there without hope often go home happy and well. But everyone cannot go to Hot Springs. It remained for Dr. Kinsey to discover the secrets of the Hot Springs of home treatment so that it can be used anywhere in any home without inconvenience, annoyance or publicity and without detaining the patient from his usual occupation.

This wonderful Hot Springs treatment is what Dr. Kinsey is bringing to Red Cloud. During this first visit he will be here but two days, March 23 and 24. Dr. Kinsey will receive patients at the Hotel Royal parlors where he will examine all patients free of charge. Those that are found to be curable will be treated at a low price, those that are not curable will not be treated at any price. The object of this two-day visit is to get a few cases to show what this wonderful Hot Springs treatment will do in the way of curing chronic diseases even after other methods have failed. Dr. Kinsey solicits only difficult cases. Cases that have failed of a cure by ordinary methods and have been given up as hopeless. Of course, Dr. Kinsey does not claim that he can cure all cases, but among these hopeless cases he will select a great many that can be cured and those that cannot be cured will be frankly told so and no money accepted from them under any conditions.

Dr. Kinsey has a national reputation among physicians on account of his wonderful knowledge of the human body. He acknowledges no peer in the matter of medical diagnosis. To demonstrate his ability he will undertake to diagnose any case in a few minutes time, describing every ache and pain and locating the cause of the trouble without asking the patient any questions. To aid him in his diagnosis Dr. Kinsey carries with him the most powerful microscope made besides many other instruments imported from the various medical centers of the world and some invented by himself and used by no other doctors in the world but the Hot Springs doctors. This visit of Dr. Kinsey at the Hotel Royal March 23 and 24 will be a wonderful opportunity for the sick and afflicted of this community who want to get well and there are many to take advantage of it.

His Informal Way.

The following anecdote, after remaining in storage many years, has been recently dusted and brought to light:

A young and afterward distinguished attorney from an up-country district of New York state was arguing his first appeal in the old general term of supreme court. He had been in many legal scrimmages in justices' courts at home, but had never stood in the awesome presence of five sedate and learned judges of the supreme court, in general term assembled. His embarrassment was great. He repeated himself and misplaced his words so often that it was quite evident that he must soon be routed by his own confusion unless something should occur to break the spell. Finally, and just as he was floundering the deepest in a chaotic jumble of language and ideas, the presiding judge interrupted with the following remark:

"Mr. Smithers, I believe it will be a great relief to yourself and to the court if you will address us in the same free and informal way that you doubtless use in addressing your local

Announcement

WE have purchased the Robinson & Burden grocery stock and are getting lined up ready for business.

We appreciate the liberal patronage already shown us and extend a cordial invitation to you to call and give us a trial. We will treat you right. Respectfully,

Johnson & Boner

PANHANDLE, TEXAS,

The lands we are going to call your attention to are in the northwest part of Texas. Take the map of Texas and you can readily see that we are trying to locate you about 650 miles from Kansas City and 500 miles from Galveston the nearest seaboard harbor of any importance, where freight rates by water to England are practically the same as from New York. To transport a bushel of wheat from Hastings, Neb., to New York by rail will cost you 40c per 100 lb or 28.9 per bu. From the Panhandle to Galveston the rate is 9c per bu. of a saving of 19.9c per bu. Can you figure the advantage that the farmer in the Panhandle has over you? To show you the great advantage the Panhandle has over you, we want to quote a few figures on the sowing and yield of wheat at the experiment station, a short distance from where we offer you these great bargains in land.

Yield of Wheat for 1906 Masko Wheat

Sowing 3 pecks to the acre yields 29.65 bushels, test 62 pounds	
" 4 " " " " " " 25.65 " " 61 "	
" 5 " " " " " " 21.50 " " 60.5 "	

Durum Wheat

Sowing 3 pecks to the acre yields 23.40 bushels, test 62.50 pounds	
" 4 " " " " " " 22.25 " " 61 "	
" 5 " " " " " " 19.20 " " 62.50 "	

Now you have the figures before you for consideration. It will take you but a few minutes to compute the difference that the Panhandle farmer gets more for his grain than you do.

If the experiment station can reach such results in farming and doing it right, you can do the same thing, or can raise 5 bu. less and beat anything you can in this part of the country.

With an average of 24 inches of rainfall for the last twelve years, nothing stands in the road of farmers becoming independent in a short time and fixing himself so he can live at ease.

Is it hot in the Panhandle, is asked by people who are not familiar with conditions in that country. We will say that the average in the hottest months in the year, for twelve years is as follows: June, 72; July, 75; August, 72, and September, 68. This government report was by the U. S. weather observer (Thos. J. Consodim), at Amarilla, Texas, right in the center of the Panhandle.

Water is procured in sand and gravel and is of the very purest quality and has proven very beneficial for the general health of mankind.

We are making these trips to the Panhandle every

First and Third Tuesdays

in each month, and would be pleased to see you and talk it over with you, as we cannot tell you all in a short ad like this.

Red Cloud Investment Co.

I. H. HOLMES, President.

D. J. MYERS, Vice-President.

A. B. SELLERS, Secretary and Treasurer

justice of the peace."

"Well, then," replied Smithers, "I wish that while I am busy alleviating your honor's dense ignorance of the law you would keep your d-d mouth shut!" The court laughed heartily and waved for him to proceed. He grew eloquent, and won his case in the midst of hearty applause.—Bohemian.

Corn Exposition Commission Appointed.

The Nebraska commission for the National Corn Exposition, to be held at Omaha, in December, have been appointed by Governor Sheldon, upon recommendations from the state board of agriculture and the corn improvers association and are as follows: William Ernst, Johnson county, president; E. A. Burnett, Lancaster county, vice-president; R. Hogue, Saline county, second vice-president; W. R. Mellor, Sherman county, treasurer. At the first meeting held by this commission E. G. Montgomery of Lincoln was appointed secretary. The state board of agriculture have appropriated sufficient funds to start the promotion for a first

class Nebraska exhibit and we would suggest that every enterprising farmer in this vicinity join in perfecting an organization for the growing of a superior grade of corn. If you will try, send in your name to the secretary. Let us show that our country is progressive.

Mrs. Robert Taylor of Duboiee, Neb., is visiting at the home of W. K. Geer.

Notice of Application For Saloon License

Notice is hereby given that B. J. Kohmetscher has filed in the office of the county clerk of Webster county, Nebraska, this 25th day of February A. D. 1908, his petition signed by the required number of resident freeholders of Oak Creek precinct, Webster county, Nebraska, praying for a saloon license to be granted by the board of commissioners of said county, authorizing the sale of malt, spirituous and vinous liquors on lot eleven (11), block twelve (12), in the village of Rosemont, Webster county, Nebraska, for a period of one year from and after the 1st day of April A. D. 1908. Hearing of said application will be held at the meeting of the board of county commissioners to be held on Tuesday, March 17, 1908, or at the first meeting thereafter.

E. W. Ross, County Clerk.

ENGLAND SAYS NO ALUM IN FOOD

and strictly prohibits the sale of alum baking powder—

So does France
So does Germany

The sale of alum foods has been made illegal in Washington and the District of Columbia, and alum baking powders are everywhere recognized as injurious.

To protect yourself against alum, when ordering baking powder,

Say plainly—

ROYAL BAKING POWDER

and be very sure you get Royal.

Royal is the only Baking Powder made from Royal Grape Cream of Tartar. It adds to the digestibility and wholesomeness of the food.
