

# Soldier Victim of Rare Affliction

DORTLAND, Ore .- Sojourning here the last several weeks has been a man who has attracted widespread attention in medical circles. He is Thomas P. Dunn, a native of Montana, who, as a member of the First Montana volunteers in the Spanish-American war, was shot through the head at Caloocan in the Philippines more than twelve years ago and is alive to tell of it today.

When Dunn fell wounded on the battlefield of Caloocan he was carried to the ward where the fatally any attention to him for two days, as ment, and idleness is something he whom the physicians and surgeons in only amusement is to join several concharge believed had better chances for recovery. At the end of two days, during which the Montana boy lay rides or journeys through the country practically without attention, the survitality and decided to try to save his life.

A Mauser bullet had entered the his remaining eye. have examined Dunn ever heard.

His remarkable recovery and the fact that he retains his reason are the most remarkable features of this case. While he is alive, in good health and able to walk around the streets and converse with his friends and acquaintances, Dunn is handicapped by the loss of all sense of smell or taste and has lost the sight of his right eye. Despite these afflictions he bears his lot with fortitude. He cannot enjoy a meal, for no matter what choice viands he may or-

der, he cannot relish them any more than he would hardtack and salt pork. The loss of the sense of taste he looks upon as his worst affliction. Tommy Dunn, as he is known among his friends, is a ward of the govern ment, though not of his own choosing for he has relatives and influential friends who take care of him and look after his comfort at all times. His impaired eyesight has proved an ob injured were placed and no one paid stacle toward his securing employ there were too many other wounded dreads because of his afflictions. His genial companions and tell stories of past experiences, or to take street car in automobiles. He cannot go to the geon in charge remarked upon his theater, being handlcapped by partial blindness and fearful lest the glare of

the lights shall impair the sight of left side of his head just above the temple and emerged from the right must report at Washington or some side just below the temple, a wound other military headquarters at certain that had previously proved fatal as periods and to undergo the periodical far as any of the medical men who examination required by the surgeon general's office.

TIME FOR HARVESTING GRAIN Left Uncut Until Dead Ripe Many

Varieties Loses Both in Quality and Quantity.

(By ROBERT H. CAHOON.) Among the numerous mistakes that lead to enormous wastes on the farm, lew are more worthy of attention than that of letting grain, oats, wheat, "ye, corn, etc. get too ripe before harvesting.

No one can ride about the country 'n summer without being struck and amazed at the prevalence of this er-

You will notice field after field that has reached, or is approaching, the period of dead ripeness, and that ought to have been harvested several days before.

The loss arising from this source is and owned costly levels, these simple more appreciable and more easily es- matters would be easy. Fortunately, imated, perhaps in wheat, of which there are on the market simple, in we cultivate comparatively little, than expensive levels made purposely for it is in other grains, like oats and rye, the farmer; \$15 will buy one, and so but the same general principle applies invested will bring in great returns. The simple level, illustrated here, to all. will meet the requirements for all

If wheat is cut two weeks or so before it fully ripens, it contains more kinds of drainage, underdrainage gluten and starch and a bushel will open ditches or drains, all kinds of irweigh more, and it will make a larger rigating work, canals and laterals, terracing land, road building, house quantity and a better quality of flour, foundation work, grading of all kinds, with a less quantity of bran or midsetting out orchards, running fences, illings, than if it were allowed to ripen. This is by no means a matter of getting angles and every sort of farm theory. It is the result of careful obwork requiring a level. Farmers, as a rule, have most of the common tools servation. and implements for doing farm work.

The straw will begin to change color slightly two or three weeks before the grain comes to complete maturity. In the best and most favorable seasons it will begin to ripen and change | tion to the farm equipment may prove color at the bottom. In some less favorable seasons the upper joints turn these tasks that have heretofore been first.

Isfactory. In the great wheat-growing sections of the far East, where wheat-growing is carried on to a much greater extent than it is here, they have studied this LOG-FLOAT point more carefully than we have, The best farmers begin to cut while a portion of the stalk is green, as soon as the kernel has passed from the "milky" to the "doughy" state.

The stalk has then begun to change color, sometimes from the bottom, sometimes for three or four inches below the head.

ment was made to ascertain the dif- a plank drag, says a writer in Rural ference, taking wheat, first, when it New Yorker. Any man who can swing was green; second, a week after, when an ax and twist an auger can make it was changing color; and third, when what you call a float or clod crushfully ripe.

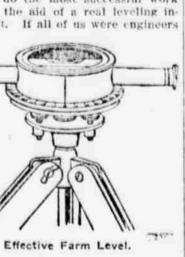

The result was in the first case 19% bushels an acre; in the second, 23%; in the third, 23%; and the same difference was found in the straw.

The total value an acre was: in that cut green, \$62.30; in that cut one week after, when the stalk was yellow below the ear \$64.61; in that cut on

Our SIX MONTHS' Guarantee Revolutionizes the Shoe Business

#### 500 Big Shoe Men Are Fighting Our Plan

We have aroused the whole world with our Six Months' Guarantee offer on shoes. We have blasted the scheme of 500 big shoe men to make the public pay Five Million Dollars a year selling expenses—\$5,000,000 for high-salaried traveling men and their big hotel bills, railroad fares, etc.—\$5,000,000 for which you shoe buyers never get one penny's worth of benefits.

We are going to do away with traveling men and their enormous expenses. We are going to make letters do the work of salesmen. We are going to sell direct to the dealer by letter. Two-cent stamps for selling expenses mean hundreds of thousands of dollars saved for better material and better workmanship-hundreds of thousands of dollars that make it possible for us to make the first and only shoe good enough to guarantee.

Indispensable to every man

## Woman Laughs Her Jaw Out of Joint

N'EW YORK.-Tee-hee-hee! Haw haw! Cra-a-a-ack!!!

Mrs. Cecilia Goldberg's birthday party was an enjoyable occasion up to this point, or, to be exact, until she dislocated her jaw laughing at her mistake in kissing the wrong man.

The occasion was the eighteenth anniversary of Mrs. Goldberg's arrival in duly popular in her set. She is a pretty young woman, and her parents invited all their friends and relatives to come around and celebrate.

Mrs. Goldberg was chosen as the first to be the blind one. She was blindfolded and led into the parlor. She was entitled to kiss

any man she could catch, and she supposed that Jim, her husband, would be on the job and see that he was caught. But a young man named Harry was caught by Mrs. Goldberg and was kissed. Jim was just a second too late. Then they pulled the blindfold off and Mrs. Goldberg saw whom she had kissed.

The crowd combined in a roar of glee and Mrs. Goldberg graciously joined in the laughter. But she overexerted herself. In the midst of an unusually loud "Ha-ha!" she grabbed her jaws and began to dance about Harlem, where she has since become the room. She gasped and groaned, and Policeman Mott, rushing upstairs, found the company in confusion and hysteria. Mrs. Goldberg seemed unable to close her mouth, and nobody

They came by the dozens, and it could hold her long enough to close it was one of those "a-gorgeous-time was- for her. A policeman gave all the had-by-all" affairs. ## Day Spent in Circus Beats School

C PRINGFIELD, Mo .- "No session of ) the public schools of Springfield after ten o'clock a. m. on circus day.'

This edict from the office of Prof. Jonathan Fairbanks, life-long educator and for 36 years superintendent of the public schools of Springfield, brought foy to the hearts of 9,000 school children, for it meant that at ten o'clock on the morning of circus days the city schools closed for the day.

"A circus is something every child ought to see," Superintendent Fairbanks said, in explaining his orders, "for it is a veritable education in itself. You can see for a small sum attractions that have been grouped together at a cost of hundreds of thousands of dollars, and which would cost large sums to see outside a cir-
