## TRAIN LOAD TRAIN LOAD OF SETTLERS

ARE GOING TO CENTRAL CANADA.

The question of reciprocal trade relations between the United States and Canada has provoked considerable discussion and interest. Whatever else the discussion may have done, it has brought out the fact that on the Canadian side of the line the agricultural situation is one that forces the fact which it is well to face, that on the American side of the border, there is a vastly increasing population to be fed with a somewhat decreasing proportion of food products. This article is intended to point out to those who may wish to become of those who can raise wheat, oats, barley, flax, cattle and hogs at the least cost that the opportunities in Central Canada are what they are seeking. During the past year the official figures show that upwards of 130,000 Americans located in Canada, and the greatest majority of these have settled on farms, and when the time comes, which it will within a few years, they will be ready to help serve their parent country with the food stuffs that its increasing population will require. The immigration for the spring has now set in in great carnest, and train foad after train load of a splendid Kansas City, Omaha, Chicago, De-Croit, St. Paul and other points. Most of these are destined through to points in Manitoba, Saskatchewan and Alberta. The reports that come from tricts good homesteads are yet availstill away below its earning capacity The immigration branch of the Domin-1911 Illustrated pamphlet, which may be secured on application to the Department of the Interior, Ottawa, Canada, or any of the agents of the Dominion Government, whose adver-Elsement may appear elsewhere in this

PHYSICAL WRECK RESTORED TO HEALTH BY GREAT KIB **NEY REMEDY** 

I feel it my duty to formish you with my testimonial as to what your remedy, Swamp-Root, did for me when I was a physical wreck from kidney and bladder

Some years ago I was not able to do any work and could only just creep around and am satisfied that had it not been for Dr. Rilmer's Swamp-Root I would not have fived. After using the preparation for one month I was able to work some and when I had used \$3.90 worth of Swamp-Root I could do a good day's work. I used about \$19.00 worth altogether and would not take \$10,000 for the good that is did use. I consider it a God-send to suffer-ing humanity for the disease for which you recommend it, and have recommended it to many sufferers.

How Sea Birds Drink. Under the headline, Where Do They Get Water? a writer in the Young Folks' Catholic Weekly says: "When I was a cabin boy I often used to wonder, seeing birds thousands of miles out to sea, what they did for fresh water when they were thirsty. One day a squall answered that question for me. It was a hot and glittering day in the tropics, and in the clear sky overhead a black rain cloud appeared all of a sudden. Then out of empty space over a hundred sea birds came darting from every direction. They got under the rain cloud, and waited there for about ten minutes. circling round and round, and when the rain began to fall they drank their fill. In the tropics, where the great sea birds sail thousands of miles away from shore, they get their drinking water in that way. They smell out a storm a long way off; they travel a hundred miles maybe to get puter it. and they swallow enough raindrops to keep them going.-New York Trib-

A mandees not count as whiled the time he spends in thinking over his business, but he seems loth to give the same sort of careful attention to his business would be worth little without good health to care for it. A business man tells how he did himself good by carefully thinking over his physical condition, investigating to find out what was needed, and then changing to the right food.

"For some years I had been bothered a great deal after meals. My food seemed to lay like lead in my stomach, producing heaviness and duliness and sometimes positive pain. Of course this rendered me more or less unfit for business, and I made up my mind that something would have to be done. "Reflection led me to the conclusion

that over-eating, filling the stomach with indigestible food, was responsible for many of the ills that human flesh endures, and that I was punishing myself in that way-that was what was making me so dull, heavy and uncomfortable, and unfit for business after meals.
