VOTE FOR BIG HOUSE AFTER

MEMBERSHIP IN CONGRESS TO BE GREATLY INCREASED.

EXPANDS FROM 391 TO 433

Bill Passed Identical With That Adopted at Previous Session-Two Important Amendments Rejected.

Washington .- A bill providing for enlargement of the national house of representatives from 391 to 433 members, and the apportionment of these members to the different states on the basis of the population shown by the recent federal census, passed the house after vain efforts of members of both political parties to amend it in important particulars. The proposed size of the house is identical with that provided for in the Crumpacker bill passed by the house at the last session of congress, but not acted upon by the senate. The Houston bill leaves to the legislatures of the different states the power to rearrange the congressional districts in their respective states on the new population basis of one member for each

211,877 of inhabitants. The two important amendments proposed and defeated after long debate were to put the redistricting power in the hands of the governors of states when the legislature had failed to act, and to limit the house in the future to a membership of 430 or 433, leaving future reapportionments to the secretary of the department of commerce and labor.
