

## Honest Labor and High Grade Lumber

is all you need to build a home that will defy time itself. Look at some of the old frame houses that have been standing right here at home ever since long before you were born. That's proof isn't it? Take it from us, when you go back on proven material like this you are surely tempting misfortune. What is true of the lumber and workmanship in these old houses should be even more likely in a house built today with such improved millwork as we have and the modern methods of building used by our leading contractors. The first thing to rid your mind of, however, is not how cheap but how good, and then let us talk it over with you and show you the lumber, sash, doors and trim we furnish.

There is one place, according to reports, where a considerable number of cattle are going on feed. That place is territory tributary of Inavale, which has for many years been a noted feeding point. C. W. Fruit of that place, who was in Monday and bought 120 head of stockers, is authority for the statement that a good many cattle will be fed there. "In the neighborhood around Inavale there are at present approximately 4000 cattle that have been taken there for feeding purposes this fall and winter." Mr. Fruit said, "One feeder has engaged 10,000 bushels of new corn at 50c a bushel, and alfalfa is now selling around \$9 in the stock."

We are pretty well fixed on hogs, and there is little doubt but what the number of cattle fed will be almost as many as a year ago.—Kansas City Drivers Telegram.

**30 Horse-power Five-Passenger Fore-Door Touring Car—**

This car is now ready for demonstration. Come and see it. To fully understand the exceptional value of this car you have but to compare it with what the entire market has to offer for 1912. Study the specifications below carefully. In what other car will you find such value at such a price? What machine under \$1259 can you line up against this and item for item see so much for so little money? When you stop to consider the fine thorough construction—the heavy drop forgings—the pressed steel frame—the selective transmission fitted with F. & S. annular bearings (which the most expensive cars in the world use)—the 30 horse-power motor, the big wheel base, the fore-door body with door handles and all levers inside the car, you can better realize what an actual advanced manufacturing step this new car is.
