COWLES

Fine weather this is for making ice. F. O. Cing delivered some fine hogs to Fuller & Bennett Tuesday.

Prof. Gregory entertained his sister and family for a few days last week.

F. A. Good went to Omaha Monday to attend the annual Lumbermen's Convention.

Richard Greenhugh is filling his ice house with an abundant amount of ice which he has shipped from Crystal Lake at Avr.

Mr. Costello has accepted the position recently vacated by Mr. Abbey with the Beatrice Creamery Co. of this place. The company have discontinued the routes indefinitely.

C. W. Fuller came home from Lincoln Monday where he had been to attend the annual meeting of the stockholders of the First State Bank of Bethany, of which Mr. Fuller is the President.

The I. O. O. F. Lodge had installation of officers last Thursday evening. W. J. Hamilton of Guide Rock was the installing officer. Six of the Guide Rock boys accompanied him to assist him in the work, after which a banquet was served to which all did justice. We would like to have the Guide Rock boys come again.

The livery barn of Cowles caught fire just after dinner Wednesday and burned to the ground. It was owned by Sidney Spracher and he carried no insurance. The barn was run by Wm. Panzer and he saved all his horses, harness and buggies, but lost his hay and grain. It is thought that the fire originated from an over-heated stove in the office.

GARFIELD

Cold weather! This just suits the team.

Danger of A Water Famine.

The Burlington Railway Company appeared before the city council last night and asked the privilege of using the city streets for their water mains which they are preparing to lay in tapping the Maurer springs. The council seemed disposed to grant the request but Mayor Fox urged the council to wait for an opinion of the city attorney and objected to the passage of such an ordinance before plenty of time had been given to think the matter over.

Had this request been granted this city would have been lost so far as water is concerned for all time to come. No one knows what our new wells will do when the warm weather and dry spell sets in. The thing for this city to do is at once condemn those springs and be assured of water if we need it. After condemning them and gaining possession of them we can make satisfactory arrangements with the Burlington. As a joint project it would be of benefit to the city and the railroad but until we know what our water will be we are absolutely opposed to the losing of these springs. We have come to the parting of the ways and we must act with decisiveness.

P. E. O. Society

Gives a Picnic

On Tuesday evening the P. E. O. Society, which so often busies itself in doing good, gave a picnic which was a housewarming and surprise party at the home of Mr. and Mrs. J. C. Mitchell. A few of the members had gathered with Mrs. Mitchell to practice some of the mysterious secret work of the organization, while the others, each accompanied by her Bill were assembling at the home of Dr. Mitchell preparatory to complete the surprise. At eight thirty, under the leadership of Holton Letson and Prof. Moritz this crowd laden with up-to-date picnic lunches marched upon the Mitchell home and enjoyed the surprise on the hostess, which seemed complete. The host however had early in the evening become sorry for his sins and was in attendance at prayer meeting, and it took three preachers and a lawyer to direct him to his home. The evening was spent in playing games, and at the midnight hour a long table, in true picnic style, was covered with good things to eat such as only the P. E. O. girls can prepare. Every Bill present did his duty, but the honors were voted to Stacy Morhart as being the biggest eater and the shortest man. Mrs. L. E. Tait, on behalf of the society, presented the hostess with a beautiful picture. To say that the picnic was a success would be putting the statement mildly.

Test Seed Corn

Every farmer among our readers should test his seed corn and now is the time to do it.

If you wait until spring other duties will occupy your time. The November freeze killed the germinating power of a great percentage of corn and you should know what you are planting. If you wish information as to how to test corn, write W. R. Mellor, Secretary of Agriculture, Lincoln, and he will send you instructions. Do this now.
