Stickney Gasoline Engines ARE THE BEST

Economy—
We Can Help You

You know that you should have a Stickney Engine but do you know what size will do your work most economically, both in cost of fuel and in the expenditure of your time as an engine too small to do the work is not true economy. It is not economy to overload your engine nor to run it at too high a speed. Again the right size of an engine will not give proper results unless the pulley sizes are right and the hook up is correct. This is where we can help you before you buy as well as look after you when you have bought.

Once more let us offer our help and show you the Stickney Engine—its outside igniter, its perfect cooling system, its automatic mixer, its ball bearing governor and its three point suspension.

Country Life Congress

Names Dates for Meeting

Omaha, Neb., Oct. 28th.—Officials of the Third Country Life Congress, which will be held in Omaha on December 16, 17, 18, and 19th, were in the city Saturday making arrangements for the meeting. The December dates were selected after a conference of the secretaries, who thought that December would be a more opportune time than January, which has been the month of the meeting heretofore.

The Nebraska Farmers Congress, the Nebraska Live Stock and Shipping Association, the Rural Life Commission, the Nebraska State Creameries Association, and the Farmers Unions will join in the meeting. The convention will be held for a period of four days, the Co-operative Association being assigned the opening two days.

The Farmers Congress and allied organizations will be given the two closing days. The program, which is in charge of W. S. Delano, secretary of the Farmers Congress, will be announced within a short time.
