#### Establish a Ranch on Public Land

. High Prices of Cattle Insures This to be a Good Business For Many Years

It is not generally known, but it is a fact, that one person can now take up 640 acres of Government Land in Wyoming as follows:

First, file a Desert land entry on 160 acres where you catch the drainage from 1000 acres, in a series of small storage reservoirs sufficient to irrigate as much as 81 acres of the entry and at least 5 acres on any 40 of the 160. For this 160 you pay the Government 25 cents an acre at the time of filing and \$1.00 an acre when proof is made

Second, file on 320 as a homestead - no charge for the land but entryman must reside upon the homestead seven months each year for three years and raise a crop on 20 acres the second year and have 40 acres in crop the third year

Third, buy 160 acres from the Government at \$1.25 per acre. This 160 must join the homestead.

There are hundreds of such locations now open to entry. If you want one of these ranches write me today for map and particulars

#### Never Red Cross Seals

Provide Friends In Need A large, rugged-looking man stopped

before a Red Cross Seal booth and looked at the display of seals with more than usual interest.

"And those will help the folks that are suffering with consumption?" he asked. He was told that was the idea "Then," he said, reaching down in his pocket, "here's where I get some seals. My wife," he explained, "died the year after we were married. She died of consumption. We were so happy' and I had done everything 1 sould for her, but I didn't have much money then, and times were hard. I lost my job, too, because I got to work so late. You see, I had the Loisework to do, and that took a lot of time. and they docked and finally fired me. I couldn't blame the company, but it was pretty hard. Right in the dead of Winter, too! I could not get her the things I would have liked to, and there was no one to help me. Not a soul, for I was a stranger in a strange city, and so was my wife. She died in the Spring," he added, as a tear trickled down his face. "And now I'm going to buy some of these seals so some other poor fellow can get help if he needs it like I needed it." And he

#### Think It Over Boys

A large delegation of our citizens went to Nelson this morning to be in attendance at the preliminary trial of taken to Nelson to answer to the charge of "crap shooting" and possibly other charges. The Journal don't like to publish these notices. We refrained from making a news item yesterday, not so much in pity for the boys as sorrow for the parents and other relatives, who are good citizens. There are a certain class of boys around this, as well as every other town, who need some kind of a lesson. Several boys here have been arrested a number of times and have been given every con sideration, by the press, by the court , the attorneys and by the people, yet they don't try to brace up and make men of themselves.

A loafer has no chance in life. A young boy who won't work, is not

good citizen and is therefore taking strong chances of becoming a most undesirable citizen.

Boys, it don't pay to loaf, smoke sigurettes and run with toughs. You will have to pay for it some day

Your parents and friends have talked to you and plead with you to go to work and try to make good citizens of yourselves. You have winked at their efforts or possibly cursed them for it. More the shame for you.

If you continue your present course ou are bound to land in the penitent.

Think it over.

Don't you think you have manhood shough to brace up, out out your bad habite, go to work and be respectable? If not you are a goner.

It is up to you. - Superior Journal. There are several "crap shooters" in Red Cloud who could take warning by this article and profit thereby.

#### Head It Off

It is good to see the war that is being waged against the tonsillectomy craze. For some special reason many school inspectors throughout the country have been insisting on the wholesale removal of tonsils of school children, and as a result the men who perform the operation are greatly benefitted by it, while the children are made innocent victms of a mere craze. In commenting upon this subject Medical Freedom says that for generations the medical world has been practically ananimous in holding that the tonsils were one of the wise provisions of nature to protect the respiraory and digestive organs; and it is perfectly safe to say that they would not have been placed in the human body of nature, and would not have a tendency to enlarge rather then diminish in size, without having some important function to perform. True there are already strong protests being made against the wholesale removal of the tonsils in the young, and the interrogation point is being raised, within the Sandhedrim of the regular, school. Thus, for example, Dr. J. W. Jervey, in the official organ of the American Medical association, points out that the much-maligned, highly complex tonsillar tissue is found only in highly developed in triduals. He states that he never found a case among negroes, or in any persons, for that matter, who were not highly developed and he argues that if these tonsils were the evils that present-day doctors claim, they would long since have disappeared with their owners under the ground, in accordance with the evolutionary theory of the survival of the fittest; and the fact that they are found only among the most highly developed people leads him to believe that there is a special purpose in this tendency. Hence physicians should be very slow to remove these organs.-Hastings Tribune.
