Frame Construction Is Most Preferable

for home building not only on account of its economy, but because of its adaptability to changing conditions. Homes built of wood are easily moved from one location to another; they can be altered or enlarged without injuring their general appearance for the reason that painting will make the old look as good as the new. Instead of painting being considered an expense it should really be held as an improvement because it freshens up the whole appearance of your home, and instead of ultimate decay and deteriorated value as is the case with substitutes that can only be renovated by building a whole new house, your home becomes constantly more valuable. This is only one of the little things to consider when building a home. "Little drops of water, etc., make a mighty ocean." Come in and we'll tell you more about lumber.
