

PROVISIONS OF THE COLD STORAGE LAW

ALL STORED PRODUCTS MUST BE BRANDED.

NEWS OF THE STATE HOUSE

Items of General Interest Gathered From Reliable Sources at State House.

Western Newspaper Union News Service. Clarence E. Harman, head of the Nebraska pure food commission, has issued a statement informing dealers and the public in general as to the provisions of the cold storage law. He states that all food which has been placed in cold storage should be branded so that it will be known, but declares that the impression that all articles which have been in storage are inferior in quality is a mistaken one. The statement in part follows:

"The Nebraska cold storage food law provides that it shall be unlawful to sell, offer or expose for sale, articles of food which have been held in cold storage without notifying persons purchasing the same. The law further provides that it shall be unlawful to represent or advertise as fresh foods, articles of food which have been held in cold storage.

"Wholesalers or operators of cold storage are required to brand all containers with a serial lot number and the date of entry and withdrawal on each and every package or container in which foods are held, distributed, or sold, containing cold storage food. The wholesaler or cold storage operator when selling cold storage foods to merchants or others, must designate on the invoice or bill sold foods as cold storage foods.

"Each retail merchant or other person when selling cold storage food, in other than original containers, must mark or brand the new container with the brand 'Cold Storage Food,' or notify the purchaser by writing or branding on the sale slip the words 'Cold Storage Food.'

"At this time of year, some fresh foods are scarce on the market, and cold storage foods must take their place. But the public should have the advantage of the difference in the price. Many articles of food that are stored in cold storage are just as good for food purposes as fresh foods, but the public has been misled by various means to believe that cold storage foods were either not good, or not the best. Decidedly to the contrary is true."

May Sell Apples from Car.

The railway commission has concluded its hearing on the rules which have been adopted by the railroad companies, forbidding the peddling of fruits, vegetables and other commodities from cars on the sidings of the carriers. In the course of the hearing C. J. Lane, general freight agent of the Union Pacific, stated that if a car were set on a track and the owner went up town and sold his apples, allowing the purchaser to go to the car and get what had been bought by him, the arrangement would be satisfactory. It was also stated that where a carload of commodities had been sold in advance and the purchasers came to the car, got their goods and paid for them, the rule which the railroads seek to enforce and which apple producers and others desire to have repealed or modified, would not apply. This was a point in which O. H. Gustafson, president of the farmers' union, evinced the greatest amount of interest.

State Profited by Transaction.

Litigation between state and federal banking authorities over the disposition of \$48,000 of notes transferred to the savings banks at Superior by the First National bank there shortly before the failure of the latter institution, has been settled by compromise. The state banking board returned \$21,000 of the paper to the national authorities and relinquished control of a \$2,600 balance which it had. This virtually divided the paper and each takes half under this plan. The salvage on the state's share will be paid into the state guaranty fund and will offset a portion of the \$54,000 paid out of that to the depositors of the state institution.

Data gathered from fifty-eight counties of the state and compared with similar data gathered from eighty-four counties of the state for 1913, show that during the year of 1914 there was an increase in the total sum of money involved in farm mortgages filed and a decrease likewise in the number of farm mortgages released. In the town and city mortgages total there was a falling off for 1914 and a falling off in the number of this class of mortgages released. On chattel mortgages the year of 1914 shows a vast decrease in the total involved—about \$30,000,000—and about the same amount of mortgages paid off.

Supt. W. S. Fast of the Beatrice institute for feeble minded has reported to the state auditor on receipts and disbursements of the special clothing fund at that institution from March, 1913, to October, 1915. This fund is derived from payments of \$40 per year for each child at the institution, made by the child's parents or guardians or by the counties from which they were committed. The superintendent shows that he received \$6,197 from his predecessor in the turn-over and has collected since that time the further sum of \$27,550, making a total of \$33,747. He has paid out for clothing, transportation and other items a total of \$22,553, leaving on hand a balance of \$11,194.

Reciprocal relations in pharmacy lines between the states of Iowa and Nebraska have not been established. The persons who pass the easier Iowa examinations and then return to this state to practice must first submit to an examination by the Nebraska board. The only way they can avoid this is to have two years' practice in Iowa. This position was taken by the state pharmacy board at a recent meeting.

COLOMBIAN INVENTS NOVEL GLIDER

One of the queerest objects to be dubbed a boat is the Yolanda II, a low-lying, rakish craft, which promises to bring about as important a change in inland water traffic as Robert Fulton's Claremont did in 1807, when she made her way up the Hudson river without sails. The boat, which is a development of the hydroplane idea, is the invention of Gonzalo Mejia (shown above), a Colombian banker, who has the contract to carry mails for the Colombian government up the Magdalena river, Colombia. When not in motion, the Yolanda II draws five inches of water, but as soon as the big retractors whir the boat glides over the surface with an inch or less of draught, at a maximum speed of 50 miles an hour.

ARMLESS, BUT A JUDGE

David Moylan, councilman, attorney and municipal judge elect of Cleveland, O., was a railroad switchman 18 years ago. An accident deprived him of his right arm. Moylan is not a man to be easily discouraged and it wasn't long before he was back at the same old stand. Seven years later another accident cost him his left arm. It was then that Moylan turned his attention to law and worked with all his might and brain until he mastered the subject. At the law examination he answered the questions with pen between his teeth. He practiced a while as a lawyer, and four years ago was elected to the city council. He made good and was returned two years ago by one of the biggest votes. In the recent election he ran for municipal judge and was elected by a good plurality. The photograph shows how Judge Moylan will sign his decisions.

Doped Horses.

"What's the matter with him?" "He's doped, that's all." "That's all! But first he is kicked and beaten and cuffed and clubbed and cursed and starved. He has stood for hours under a blazing, scorching sun, or driving, blinding sleet. He has joggled wearily along in a drenching rain. He has faithfully hauled a load too heavy for him in the face of a raw, piercing wind—and has gone without many a meal. But when he has outgrown his usefulness, or has sickened from neglect, though he may have given years of loyal service, he is not cared for or decently shot, but he is doped for sale. His master gives him a dose of ginger and whisky mixed with an opiate. This livens him up a bit and so increases the chance of making an extra dollar. This practice is being closely watched by the only friend in authority dumb beasts have, the Humane society. It is a practice resorted to by people of profound ignorance and poverty, and others with natures deliberately cruel.—Exchange.

Not a Booklover. After spending the summer in a mountain hamlet in Tennessee, the visitor hired a native to help pack up. As they were engaged in boxing a shelf of books the mountaineer remarked: "Somehow, ah nevañ keered much for books; but," he resumed after a thoughtful pause, "ah can't read, an' mebbe that had sumpin' to do wit' it." —Exchange.

THE NEWEST REMEDY FOR BACKACHE, RHEUMATISM AND DROPSY

Kidney, Bladder and Uric Acid troubles bring misery to many. When the kidneys are weak or diseased, these natural filters do not cleanse the blood sufficiently, and the poisons are carried to all parts of the body. There follow depression, aches and pains, heaviness, drowsiness, irritability, headaches, chilliness and rheumatism. In some people there are sharp pains in the back and loins, distressing bladder disorders and sometimes obstinate dropsy. The uric acid sometimes forms into gravel or kidney stones. When the uric acid affects the muscles and joints it causes lumbago, rheumatism, gout or sciatica. This is the time to send Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., 10c for large trial package of "Anuric."

During digestion uric acid is absorbed into the system from meat eaten, and even from some vegetables. The poor kidneys get tired and backache begins. This is a good time to take "Anuric," the new discovery of Dr. Pierce for Kidney trouble and Backache. Neglected kidney trouble is responsible for many deaths, and Insurance Company examining doctors always test the water of an applicant before a policy will be issued. Have you ever set aside a bottle of water for twenty-four hours? A heavy sediment or settling sometimes indicates kidney trouble. If you wish to know your condition send a sample of your water to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and describe symptoms. It will be examined without any expense to you, and Dr. Pierce or his medical staff will inform you truthfully. Anuric is now for sale by dealers, in 50c pkgs.

Wear Out Your Old Tires

THE Fisher RIM-GRIP CASING
SOLID RES-CT TIRE
PREVENTS SLOW-OUTS
DOUBLES TIRE MILEAGE
WILL NOT SHAY OR CRACK
COSTS LESS THAN HALF THE
PRICE OF A NEW TIRE

The flexible steel rims or bands marked (B) are endless and lie flat against the inside of the tire opposite the beads. These metal rims answer the same purpose in the Sub-Casing that the beads do in a regular tire. When a tire is rim cut as shown by letter (B) the Sub-Casing holds the pressure for the reason that the metal rims (B) are below the rim-cut, and there is no chance for the Sub-Casing to be forced through the rim-cut, as would be the case with ordinary retiners which are loose at the edges next to the bead. Bumper Grain Crops

Good Markets—High Prices

Prizes Awarded to Western Canada for Wheat, Oats, Barley, Alfalfa and Grasses

The winnings of Western Canada at the Soil Products Exposition at Denver were easily made. The list comprised Wheat, Oats, Barley and Grasses, the most important being the prizes for Wheat and Oats and sweep stake on Alfalfa.

No less important than the splendid quality of Western Canada's wheat and other grains, is the excellence of the cattle fed and fattened on the grasses of that country. A recent shipment of cattle to Chicago topped the market in that city for quality and price.

Western Canada produced in 1915 one-third as much wheat as all of the United States, or over 300,000,000 bushels.

Canada in proportion to population has a greater exportable surplus of wheat this year than any country in the world, and at present prices you can figure out the revenue for the producer. In Western Canada you will find good markets, splendid schools, exceptional social conditions, perfect climate, and other great attractions. There is no war tax on land and no conscription.
