Whalebone Corsets shape the latest figure fashion 70-7070

It looks long, but it is most comfortable. You will realize with one day's wear, if you are a large woman, that it's the most comfortable Corset you have ever worn.

The material of the corset skirt extends soft and unboned several inches beyond the boning, which is genuine Artic whalebone, recognized by the fashion makers as the superior boning. It has "Security" Rubber Button Hose Supporter attached at front, side hip and back.

There is no corset particularly made for stout women that is so fashionably cut. Other corsets may reduce the figure, but they do not shape it into fashionable lines. Try this model: we can fit you.
