Ours Will Be Some Army?

WASHINGTON, June 19.—America's armies will be made up of the finest physical manhood of the nation.

Army surgeons today estimated that nearly 40 per cent of the men brought to the colors by the selective draft will be rejected upon the first physical scrutiny, so severe are the examinations. Nearly one million must be drawn to get the 625,000 for the first levy. At present the rejections in the regular army average 40 to 60 per cent of the applicants.

After undergoing the severe examinations imposed by the army surgeons, the chosen ones will form the best army physically in the world. In no other army are the physical requirements so hard to meet. Even Germany's armies are picked on a less stringent scale of requirements.

Here are the general requirements for the army:

Height—Not less than five feet, four inches, nor more than six feet.

Weight—Not less than 128 pounds nor more than 190.

Lungs and heart must be well nigh perfect. Any heart "murmur" disqualifies. Hearing and sight must be good. Color blindness is not necessarily a disqualification.

Chronic diseases or mental disorders cause rejection. Loss of fingers or toes, or an ear, are disqualifications.
