Will Soon go into Training

The entire 687,000 men forming the first increment of the draft army will be under training early in October. In accordance with orders issued on August 13 the first 30 per cent of the quota of each district will depart for cantonments on September 5th; the next 30 per cent on September 15 and another 30 per cent on September 30. The remaining 10 per cent will be mobilized as soon after that date as possible. This order means that about 12,000 men will reach each of the sixteen cantonments soon after September 5th and upon arrival there will be examined physically by army physicians and fully accepted or rejected. It is expected that many who are filing claims of exemption on the strength of family dependents will be disappointed, as unless they are absolutely dependent upon the drafted man they will not be exempt. Religious belief also will not excuse a man, as it is ruled that those whose conscience will not permit them to take part in the activities on the firing line will be compelled to serve in the quarter-master's corps, medical corps or other units not employed in actual combat.

Ford Tractor at Cowles

The gentleman in charge of the Farmers Union County Picnic which will be held at Cowles on Saturday, August 18th, informs us that arrangements are about completed for the big event and that all advertised attractions will be given. Aside from the regular program which has been arranged an extra attraction has been scheduled for that day. A Ford tractor demonstration will be given. A man of experience will show the interested people how a device can be attached to an ordinary Ford car which will convert it into a tractor, thus enabling the farmer to use his car for work in the fields as well as for pleasure purposes. No doubt this will prove to be an interesting feature and should demand the attention of every progressive man in the county.

Do You Really Know that Warner's Rust Proof Corsets are Actually Rust Proof?

Have you tested them to prove this? We wish you would then you would know what we really mean when we say "guaranteed rust proof."

It is not enough for a corset to shape well it must wear equally as well as it shapes. Every day it must prove its virtue through shaping comfortably, wearing without splitting, without breaking or rusting in these "piping hot" days that test even the best corsets.

You Can Depend Upon Your Warners!
