Entered in the Postoffice at Red Cloud, Neb as Second Class Matter

A. B. MCARTHUR PUBLISHER  
M. K. QUIGLEY MANAGER

THE ONLY DEMOCRATIC PAPER IN WEBSTER COUNTY

Red Cloud's fondest dream will soon be realized as three cars loaded with casing and derrick for the Big Chief Oil and Gas Company's local project have arrived in this city and as soon as the builder arrives here work will be begun on the erection of the derrick. Shortly we will have millionaires galore, speeding in super sixes o'er the tranquility of silent hills and fertile valleys—our people satisfied that they have done their share in determining just what lies beneath Webster county's fertile soil.

Governor Neville has shown himself to be not only a good statesman but also a real patriot as it has been announced that, on Saturday, he was placed in command of the Seventh Nebraska reserve infantry. His resignation as chief executive of the state will take effect immediately after the Seventh has been mustered into service. The chair will be filled by Lieutenant Governor Edgar Howard.

According to the monthly report issued by Secretary of State Pool, Nebraska now has 142,000 automobiles. The number in the state last year was 100,500. During the month of September the secretary's office issued 4-150 licenses. A hundred motorcycle licenses were issued.

The more potatoes you eat the less bread you need at the same meal. Potatoes do not contain the same amount of food value as the same weight of bread, as the former contains much water, but it may be stated that a medium sized potato will supply as much starch—a most important food—as two, medium slices of bread. In a mixed diet, five parts of potato are equal to one part of cereal which means that those who like potatoes can, by their use, safely cut down on their use of bread, wheat mushes, or macaroni and yet supply their bodies with that needed food—starch. Wherever potatoes are locally plentiful, as they promise to be this year, housewives are urged to use them as a substitute for wheat.

#### Feeding Dairy Cows.

"Feeding Dairy Cows," Extension Bulletin, No. 48, has just been issued by the Extension service of the College of Agriculture. It will be sent free upon request to the Bulletin Clerk, University Farm, Lincoln.

#### School to Open.

Final preparations for the opening of the School of Agriculture of the University of Nebraska October 12 are nearing completion. Students are already beginning to arrive at the University Farm to engage board and room. Class schedules and assignments of rooms and teachers have been mapped out.

The school accepts free tuition certificates (given by school boards in rural districts) in payment of fees. Complete information regarding entrance requirements may be obtained upon application to the Principal, School of Agriculture, University Farm, Lincoln.

#### The Devil Resigns in Favor of Kaiser.

An exchange says the following is the best yet: "The devil set by a lake of fire on a pile of sulphur kegs, his head was bowed upon his breast, his tail between his legs, a look of shame was on his face, the sparks dripped from his eyes—he had sent up his resignation to the throne up in the skies. 'I'm down and out,' the devil said—he said it with a sob—'there are others that outclass me and I want to quit the job. Hell isn't in it with the land that lies along the Rhine; I'm a has-been and a piker and therefore I resign; one ammunition maker with his bloody shot and shell, knows more about damnation than all theimps of hell. Give my job to Kaiser William, the author of the war; he understands it better a million times by far. I hate to leave the old home, the spot I love so well, but I feel that I am not up-to-date in the art of running hell.'"

#### Potato Storage.

Severe losses from dry rot have done much in the past to discourage potato storage in Nebraska. These losses may be largely avoided if the following precautions are taken:

1. Carefully grade the crop and do not store diseased or bruised potatoes.
2. Treat these graded potatoes with formalin. This must be done within 24 hours after digging to be most effective.
3. Maintain a temperature of 35 degrees to 40 degrees Fahrenheit, preferably nearer 35 degrees.
4. Arrange for thorough ventilation of the pit or cellar. It is important that no potato be more than three feet from free air. Storing in deep piles leads to overheating and may seriously damage the tubers for seed purposes.

Further information may be obtained from the department of plant pathology and physiology at Lincoln.

#### Speculation in Food Stuffs Will be Stopped.

Omaha, Neb., Oct. 3.—"Speculation in food stuffs and necessities of life must stop." That is the ultimatum issued by Food Administrator Wattles upon his return from Washington, where he has been in conference with Food Administrator Hoover.

"We do not propose that speculators are going to profit from this war. The interests of the people must be conserved. The speculation of past years is gone forever. The accomplishment in the matter of wheat is an evidence of what can be done, and we propose to save the American people the profits of their labor."

Among the things Mr. Wattles is charged with is to see that abuses in the matter of marketing food stuffs are stopped; the redistribution of live stock on farms; adjustment of

# Buy Land

Located in the Most Prosperous, Most Productive Most Beautiful and Most Intensively Cultivated Section of Northern Colorado

The Chicago Title & Trust Co., as Trustee for the sale of the 50,000 acres of irrigated land, under the Farmers' Reservoir and Irrigation Co. system, has authorized us to offer this land in any size tracts to suit the purchaser, with assurance of plenty of water for irrigation, on terms of ONE-TENTH DOWN, with ten annual payments, without any payments required for the first four years except Two-Fifths of the crop and taxes.

Any balance left unpaid after applying Two-Fifths of the crop will be extended over to the tenth and last payment, so purchaser cannot possibly become delinquent before the end of the fifth year.

This 50,000 acres of land is second to none in the State of Colorado. It lays north of Denver, and east and west of Brighton, Fort Lupton and Platteville. 40,000 are under irrigation canals that are completed, but only from 6,000 to 8,000 acres are under cultivation.

This leaves 32,000 acres ready for the plow today. Farmers who want more land or renters who want a place of their own, with good land and plenty of water for irrigation, close to market, schools, churches and all modern conveniences, where they can grow Alfalfa, Wheat, Oats, Barley, Sugar Beets, Potatoes, all kinds of Garden Truck and Fruit, where the dairy business pays, at from \$85 to \$110 per acre, including both land and water, can take advantage of this liberal offer now while the price of land is low and the payments are arranged so the farmer can practically pay for the land from the crops before the second payment is due.

Come to our office, get some literature on this tract, study it over, and make arrangements to join us on one of our trips to see this land. The expense is small, for after we get to Denver, the Company will take us free of charge in automobiles to see this land, which is only about from one to two hours drive from Denver, and in case it suits you, and you buy, the Company will refund your R. R. fare. Reports of this year's crop of wheat went from 25 to 40 bushels to the acre. Come and make a trip with us and see if this is so.

By permission we refer you to H. E. Grice, of the H. E. Grice Drug Co., of Red Cloud, who has been in touch with this proposition for a number of years, in fact, since before the water was on the land. He owns several 80 acre tracts of this land and it is not for sale. He has just recently returned from a trip over this land, inspecting his holdings, and collecting rent. Have a talk with him about the crops and general conditions of this land, then make arrangements with us to go and see for yourself.

## Hutchison & Saladen

Red Cloud, Nebraska

charges for handling live stock; the securing of signatures to pledge cards and other things of national importance.

He is a busy man these days and his efforts are all along the line of conserving and saving for Nebraskans.

Fred Kuehn has purchased the pool hall and bowling alley formerly conducted by Powell Bros. and has taken possession. Without a doubt the new proprietor will make a success of the business venture as he has a host of friends in this vicinity.
