New is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckies, as the prescription othline—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckies have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength oth-

He Must Have Run Then. Dr. J. P. Naylor, head of the physics department of De Paul university, was walking down a slippery

sidewalk and, hitting a particularly icy place, fell down. H. M. Gorrell, Doctor Naylor's assis-

tant, was following him. "You are somewhat of an architect aren't you. doctor?" asked Gorrell.

"How's that?" asked the professor. "You are making blue prints."-Indianapolis News.

BOSCHEE'S GERMAN SYRUP

will quiet your cough, soothe the inflammation of a sore throat and lungs, stop irritation in the bronchial tubes, insuring a good night's rest, free from coughing and with easy expectoration in the morning. Made and sold in America for fifty-two years. A wonderful prescription, assisting Nature in building up your general health and throwing off the disease. Especially useful in lung trouble, asthma, croup, bronchitis, etc. For sale in all civilized countries.—Adv.

Life Still Has Its Joys.

If you are troubled with the belief that war has taken all the joy out of life, you should have been on hand when the playful wind took the fat man's hat and he made a ziz-zag race for it along the street car tracks, and noticed what a lot of people stopped to laugh their eyes full of tears at the spectacle.—Seattle Post-Intelligencer.

LIQUID BLUET No. Mr. Grocer, that's mostly water. Since the war started it's more nearly all water than ever. Give me Red Cross Ball Blue, that's a two-ounce package of real goodness. You should see my clothes. I just can't keep from smiling out loud.—Adv.

Ah, Me! He-Each hour I spend with you is like a pearl to me.

She-Aw, quit stringing me.-Jester.

Not Certain. "My dear, do you love me still?"
"How can I tell? I've never yet seen you that way."

Getting Even With Grump. "This certainly is a hard winter." "Huh. Any fool knows that." "Then I needn't have told you."

NINE PAIRS SHOES

GENERAL ASKS FOR LARGE FOOTGEAR SUPPLY FOR SOL-DIERS IN FRANCE.

AIRPLANE MISHAPS ARE FEW

With Hundreds of Men Learning to Fly, War Department Records Show Number of Accidents at Military Aviation Fields Comparatively Small.

Washington.-Gen. Pershing has requested shipment of 18,590 pairs of shoes for each 25,000 men monthly, which is approximately nine pairs of shoes per man per year. This quantity is in excess of actual consumption and is being used to build up a reserve for all troops in France. When such a supply is accumulated, the quantitles per man will be reduced.

The quartermaster general's department now has on hand and due on outstanding contracts, 7,564,000 field shoes and 7,873,000 marching shoes. It will be necessary to secure more than a million additional shoes during the year.

Records of the war department show that from the beginning of training in June, 1917, to February 22, 1918, the fatalities at military aviation fields In this country have been 51; 10 officers and 29 cadets killed in training flights, and 12 men killed in unauthorized flights and ground accidents.

Since the training began in the United States, student aviators have flown considerably more than 100,000 miles. Hundreds of hitherto inexperienced men have been learning to fly. Their early flights are under the guidance of instructors, and prior to these flights two or more months are spent in preliminary ground work. There comes a time, however, when every student aviator must take his machine up alone, and every precaution has been taken to reduce the number of accidents and safeguard the aviator in his solo flights.

The fuel administration is carrying on a series of conferences covering all industries which use large quantities of fuel, with a view to learning the requirements of each line during 1918. The industries themselves are playing a leading part in these discussions.

The aim of the fuel administration is to arrive at a percentage of production which, under the circumstances, will be satisfactory to the manufacturers and their workmen, but which will not represent a comsumption of fuel for the manufacture of supplies not needed during the current year.

The order which has been issued limiting the use of fuel for the production of window glass to 50 per cent of the amount manufactured in 1917 is the result of one of these conferences. A survey of the field indicated that while not more that 5,000,000 boxes of window glass would be used in 1918, competitive conditions were likely to result in an overmanufacture of at least 2,000,000 boxes.

It is through this system of limitation, together with large economy in the methods of using fuel, that the fuel administration expects to supplement the production of coal this year. It is hoped, as the railroads strenghten their facilities, that it will be possible to mine and transport a larger quantity of coal this year than last, but it is through these methods of reducing consumption that a repetition of this year's shortage is expected to be pre-

Rifle and cartridge production in the United States has developed in volume and in quality on a scale assuring the satisfactory equipment of the army, according to a statement authorized by the secretary of war.

To achieve the rifle and ammunition production program the government has expended or has obligated itself to expend, during 10 months of war, \$400,000,000, and 200 officers, 80,000 men, and 10,000 women have been engaged exclusively in the manufacture of rifles and cartridges. Two government plants and three privately owned plants are engaged in making rifles and one government plant and nine privately owned plants are engaged in cartridge manufacture. Ordnance experts in this country and in Europe are in agreement that the United States army is being equipped with two of the best three rifles in the world.

"Stars and Stripes" is the name of in France for American troops, under the direction of the intelligence section. Practically the entire paper is a daily radio report of about 1,400 words supplied by the committee on public information to the French government.

Exports of corn to Canada for feeding and manufacturing purposes have been limited to those varieties and grades which are not suitable for seed purposes.

Divisional athletic directors who have received commissions will accompany their contingents to France, according to the war department commission on training camp activities. Boxing instructors will not be sent with the troops, as at present the need for these men is considered greater

A Swiss commercial paper states that there is a great shortage in coul of all kinds, an insufficient supply of wood for fuel, and small reserves in oils and grease throughout Switzerland. Fresh eggs have disappeared from the market. Dry vegetables are becoming more scarce. A project to manufacture flour from potatoes had to be abandoned because sufficient sup-

plies of potatoes could not be secured. In Holland coal and coke prices have been advanced. In American terms, the maximum price for anthracite is about \$22 a ton; coke, \$10 a ton; coal briquets, \$25 a ton. Distribution is carefully regulated by cards, in specified quantities. The amount allowed, especially to residences, is much smaller than in peace times.

New French food regulations forbid eating houses to serve of consume fresh or packed butter otherwise than in the preparation of food. Curdled or sour milk is prohibited as well as cream and specified kinds of cheese. The making of pastries, biscuits, and confectionery is prohibited. Only in dining cars, canteens and railroad refreshment stations may fresh or condensed milk or cream be served after 9 in the merning, by itself or mixed with coffee, 'en, or other preparation. No solid foods may be served between 9 and 11 in the morning and between 4:30 and 8:30 in the evening. When the price of a meal exceeds \$1.20 the customer may be served with not more than two dishes with or without vegetables, or more than one small loaf of ordinary bread. The bread is limited to about 31/2 ounces. All grain which may be used for making bread is reserved for human food.

At each cantonment in the United States a school has been established where every officer and man receives instruction in gas defense. The American gas mask, similar to the British, is as mechanically perfect as the best experts have been able to produce. The face piece, with glass or celluloid eyepleces, is connected by a flexible tube with a canister carried in a knapsack. The incoming breath comes through the canister, which is filled with several layers of chemicals which neutralize or render harmless the gasladen air. Outgoing breath passes outside the face piece through a small valve.

The student in gas defense soon learns to get his mask on in a hurry, six seconds being the standard time when the knapsack containing the mask is hanging at his chest in the "alert" position. After intensive training a gas attack is arranged. The class is put in trenches, and without warning. clouds of smoke and chlorine are liberated by the instructors, masks are hurriedly put on, alarms sounded, and sleeping men in dugouts aroused. When the attack ceases the trenches are cleared of gas, the air is tested. and permission is given to remove masks.

Describing the American Red Cross as a body authorized to do everything possible for the comfort and welfare of the soldiers, and to make use of such agencies as are authorized and are in a position to contribute to tha end in addition to the provisions made by the government, a general statement by the war department outlines certain approved activities:

To distribute sweaters, mufflers, hel-

mets, socks, comfort kits, etc. To render emergency relief of every kind upon request of an officer in charge.

To relieve anxiety and sustain the morale of soldiers who are worried about their families at home, and to promote the comfort and well being of these families.

To conduct canteen service stations for furnishing, refreshments to soldiers when traveling through the country; to furnish emergency relief to the sick and wounded when en route and to see that they are conveyed to a hospital when necessary and requested by the commanding officer.

A representative of the Red Cross may be attached to each base hospital to furnish emergency supplies when called upon, to communicate with familles of patients, to render home service to patients and such other assistance as pertains to Red Cross work.

When the first Liberty motor was rendy to be tested it was taken to Pike's Peak that it might be studied while running under atmospheric conditions obtaining at high altitudes. This difficulty of bringing the motor to the mountain is now overcome at the department of commerce bureau of standards at Washington, by bringing the mountain to the motor.

Airplane motors are now tested at the bureau of standards in a laboratory where various conditions corresponding to high altitudes and low temperatures are secured. The engine the weekly newspaper being published is placed in an air-tight concrete room, provided among other things with refrigerator colls and a large pump to reduce the presure of the air. By use devoted to American news, including of this apparatus motors may be observed under conditions similar to those at different altitudes, which might otherwise be done only by actual airplane flights.

> Plans of the American Library association include the establishment of book and library service in army and navy hospitals in America and France.

> The government is today the greatest employer of labor in the United States, not considering railroad employees.

In normal times approximately 400,-000 civilians are employed, and in the last year the number has increased to 600,000. In comparison one steel corporation employs 300,000 men, and one railroad 250,000

IMPROVED UNIFORM INTERNATIONAL

ESSON

LESSON FOR MARCH 10 JESUS RESTORING LIFE AND HEALTH.

(May be used as missionary lesson.) LESSON TEXT—Mark 5:21-45. GOLDEN TEXT—Himself took our in-firmities and bear our diseases.—Matt. 8:17.

8:17.
ADDITIONAL MATERIAL FOR
TEACHERS—Matt. 9:27-36; Luke 7:16-17;
11-19; John 5:1-9; 11:1-46; 10:7-18.
PRIMARY TOPIC—Jesus restoring the
little girl to life.
MEMORY VERSE—Bless Jehovah O my
soul, and forget not all his benefits.—Ps.
103:2.

INTERMEDIATE TOPIC-Jesus the giver of life.

MEMORY VERSE-John 10:10.

BENIOR AND ADULT TOPIC-Medical

This is one of the most beautiful stories of the Bible. It appeals to the loving parents' hearts and charms the attention of every child. The intro-duction of the woman who touched the Master's garment is referred to by three of the gospel writers and gives us an intensely interesting sidelight on the reception accorded to Jesus during his

Galllean ministry.

The dramatis personae is as follows: (1) The Father is about to lose all the poetry and music of his home. (2) The Child, twelve years old, is just on the threshold of Jewish womanhood. It takes little imagination to picture how her life had entwined itself about the heart of the father and the other loved ones. The stricken child is still to be found in the land, and it is this background which makes the picture so vivid. Why the suffering? Why the separation? Only our Heavenly Father knows it all, and some day we will read the answer in the glory of his presence. (3) The Woman, who-where from or whither to we are not told-only one of a vast throng who had just faith enough to touch the hem of his garment and be made whole. (4) The Galliean Prophet's response to the furtive touch of need was instantaneous, but without the marring movement of haste. We can fancy these characters walking along the highway. Jesus paused as they were interrupted. The woman was healed the moment she touched his garment. What is the meaning of the pause?

Having taught the multitude and encouraged the heart of Jairus, they reached the home, where Jesus exclud-ed all but Peter, James and John, who entered with him into the house of tumult, made somber by the weeping and wailing of professional mourners and relatives. Again we are impressed with the

Calm Dignity of Jesus.

as he asked, "Why this tumult? the child only sleeps." Their laughing power of the Mighty Christ in face of the fact that the child was really dead. When he had turned the unbelievers out, Jesus took the father, mother and disciples into the chamber of death. The occasion was not for a spectacular demonstration of power. Having restored the child to life and to its parents, Jesus admonishes them not to publish the news broadcast. Evidently he was not yet ready to precipitate matters in the minds of the multitude, for of a surety he knew that in certain quarters the fact of the cure would be made known.

This is a beautiful picture of love: (1) The Father's love (vv. 22-24). (a) His need; (b) his position "at Jesus" feet;" (c) his plea, "I pray thee;" (d) his insistence, "besought greatly." (2) The Stranger's Plea (vv. 25-35). (a) An interruption; (b) "Of long standing;" (c) Jesus' knowledge; (d) Jesus' response; (e) her confession; (f) her blessing. (3) The Master's Love (vv. 35-43). (a) Jesus' knowledge; the child was not dead in his sight; (b) delay does not mean refusal; (c) the tender resurrection in answer to faith; (d) the provision for her needs.

Sorrow brought Jairus to Jesus. Sorrow today brings more men to Jesus than perhaps any other means. Certainly it has been so during this great war. As the ruler of the synagogue Jairus laid aside his pride and hostility to make his pien for help and accept service of Jesus.

There are three recorded instances where Jesus raised the dead. This 'only daughter," which was a simple and apparently easy matter. (2) The "only son" of a widow, when he "stopped the bier." This was apparently attended with more difficulty than that of the little girl, for "she only slept." The raising of Lazarus, a grown man, apparently presented still greater difficulties. Viewed from our human angle there were difficulties, but with God there are none. His flat created the time and matter worlds. To ascribe difficulty to God is but to judge

hib by our standards. .The great need in the foreign field is evangelization supplemented by education and the ministry of healing through dispensaries and hospitals. In the midst of the present war situation let us not forget our responsibility to the unevangelized at home and abroad. Jesus is still the Resurrection and the Life for "sleeping" children, commu-

uitles and nations. Why did Jesus spend so much time in working miracles? To impress the value of his life upon the world as a testimony to his divine office, and a prophecy of his authority in his coming Kingdom.

One Box Dodd's Kidney Pills

Relieves Mrs. Frey's Rheumatista

Mrs. Ira Frey, of Le Mars, Ia., suffered for six long months with the agonies of rheumatism. Then she heard of Dodd's Kidney Pills and bought a box. Here is what she writes:

"For six months I had rheumatism. I had swelling of the limbs, stiffness in the joints and cramps in the muscles. I suffered greatly from backache. My limbs feit heavy, and I had a dragging sensation across my loins. I had a great deal of pain in the top of my head, was often dizzy and had flashes of light and floating specks before my eyes. I had heart flutterings and could not sleep well. My appetite was fitful and I felt heavy and sleepy after meals. I suffered from shortness of breath. After taking one box of Dodd's Kidney Pills I was much improved."

Always Before Him. "He is a great stickler for proce-

dure, isn't he?" "I should say so! Why, even the furniture covers in his house are all bound with red tape."

Catarrh Cannot Be Cured Catarrh Cannot Be Cured
by LOCAL APPLICATIONS, as they
cannot reach the seat of the disease.
Catarrh is a local disease, greatly influsneed by constitutional conditions. HALL'S
CATARRH MEDICINE will cure catarrh.
It is taken internally and acts through
the Blood on the Mucous Surfaces of the
System. HALL'S CATARRH MEDICINE
is composed of some of the best tonics

Officer - Conscientious objections? Rubbish If you were to come home and find your wife fighting a burglar, wouldn't you interfere?

"No, sir! I'd leave the burglar to his fate."-Life.

RECIPE FOR GRAY HAIR

To half pint of water add 1 os. Bay Bum, a small box of Barbe Compound, and 14 os. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbe Compound. It will gradually darken streaked, faded gray hair, and make it soft and closer. It will not color the scalp, is not and glossy. It will not color the scalp, is not sticky or gressy, and does not rub off. Adv.

Sure Proof.

"Do you know anything of the art of husbandry?" "I ought to; I've married off five daughters."

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels. Ad.

An implement has been patented by a New York man to enable a blind person to thread a needle.

To drive a tank, handle the guns, and weep over the enemy trenches, takes strong nerves, good rich blood, a good stomach, liver and kidneys. When the time comes, the man with red blood in his veins "Is up and at it." He has iron nerves for hardships—an interest in his work grips him. That's the way you feel when you have taken a blood and nerve tonic, made up of Blood root, Golden Seal root, Stone root, Cherry bark, and rolled into a sugar-coated tablet and sold in sixty-cent vials by almost all druggists for past fifty years as Dr. Pierce's Golden Medical Discovery. This tonic, in liquid or tablet form, is just what you need this spring to give you vim, vigor and vitality. At the fag end of a hard winter, no wonder you feel "run-down," blue, out of sorts. Try this "Medical Discovery" of Dr. Pierce's. Don't wait! To-day is the day to begin! A little "pep," and you laugh and live.

The best means to oil the machinery of the body, put tone into the liver, kidneys and circulatory system, is to first practice a good house-cleaning. I know of nothing better as a laxative than a vegetable pill made up of Mayapple, leaves of aloe and jalap. This is commonly sold by all druggists as Dr. Pierce's Pleasant Pellets, and should be taken at least once a week to clear the twenty-five feet of intestines. You will thus clean the system-expel

the time to clean house. Give yourself a spring house cleaning.-Adv. -A BAD COUGH is risky to neglect. Take it in hand, and safeguard your health by promptly taking

the poisons and keep well. Now is
