

THE JOY OF MOTHERHOOD

Came to this Woman after Taking Lydia E. Pinkham's Vegetable Compound to Restore Her Health

Ellensburg, Wash.—"After I was married I was not well for a long time and a good deal of the time was not able to go about. Our greatest desire was to have a child in our home and one day my husband came back from town with a bottle of Lydia E. Pinkham's Vegetable Compound and wanted me to try it. It brought relief from my troubles. I improved in health so I could do my housework; we now have a little one, all of which I owe to Lydia E. Pinkham's Vegetable Compound."—Mrs. O. S. JOHNSON, R. No. 3, Ellensburg, Wash.

RAT IS FRIEND OF MINERS

Workers Warned of Coming Catastrophe When the Rodents Leave Tunnel—Are Fed by Men.

Investigators of mining conditions and the peculiar dangers to which miners are subjected recently have taken much interest in the practice of Western gold miners to make pets of the rats which commonly infest mines. On the mother lode of California it has been found that the miners invariably feed the rats and take care of them, believing that the rodents are a source of protection against accident, says Our Dumb Animals. This is due, the men say, to the instinct of the rats, which warns them when a tunnel is unsafe. And when the rats leave a tunnel it is almost impossible to get the miners to work there. This recalls the belief among sailors that rats will leave a doomed ship. The miners also have found that rats are much more susceptible than humans to the dangerous gases that so often cause loss of life in the mines. Long before the miners themselves are affected by these gases the rats become sick and show symptoms of distress. So the men keep close watch of the rats' good health.

CITY'S HIGH TITLE

Cuban Capital Given Long Name, by Royal Decree.

Has Been Considerately Shortened to Habana, but That Was Not Its Appellation in 1634—Place Had Remarkable Growth.

The full name of the capital of Cuba is San Cristobal de la Habana. In 1634 a royal decree conferred upon the city the sounding title, "Llave del Nuevo Mundo y Antemural de las Indias Occidentales" which signifies "Key of the New World and Bulwark of the West Indies." In emphasis, the coat of arms of the municipality bears a symbolic key and representations of the fortresses of Morro, Punto and Fuerza.

Habana is one of the several towns founded by the governor, Diego Velazquez. He placed it upon the south coast, where the town of Batabano now stands. It was shortly removed to its present position and rapidly it grew to be the chief center of the island and one of the most important places in the new world. La Fuerza, the oldest fortification in the city, was erected near the close of the sixteenth century. Shortly afterward, Philip the Second of Spain ordered the construction of the Punta and Morro forts, for the protection of the harbor, and at about the same time the official residence of the governor of the island was transferred from Santiago de Cuba to Habana.

DID WORK OF HIGH ORDER

Designs Wrought by Ancient Peruvian Dyers Have Been Given Much Praise by Experts.

The ancients of Peru, by a curious coincidence—for there could not possibly have been any intercourse with their contemporaries in India and Egypt—seem to have used much the same kind of processes in printing their designs upon the fabrics they manufactured. Both Herodotus and Pliny, among early historians, have told us about the cloths of vegetable fiber made by the ancients; but in all likelihood the fabrics of the Peruvians were of even a more remote date. In some respects the methods of today bear strong resemblance to the older practice. The chief difference consists in the patterns now being engraved upon copper rollers and several colors being printed at one time. Just as today the coloring matter of dyes is not mixed by merely printing it on the material, but is secured by means of a substance known as mordant, so did the Peruvians make use of a property which caused the dye to adhere and to withstand a test of thousands of years' wear and tear. Experts have declared that in the direction of technical and artistic value the designs in question have no equal.

It Didn't Work. The miscreant stood before the judge, charged with cruelty to his wife. On the hope of obtaining clemency he thought he would pay his wife a cheap compliment. "Tell you right now, judge. They got me wrong on this cruelty stuff. I've got some woman. She sure is hard to beat." "Well, you seem to have overcome all obstacles, from her appearance," remarked his honor. And he handed him the limit.

How They Conversed. An American liaison officer who knew little French and a French artillery officer who knew little English had important business together during the height of the recent fighting. "Henri," said the commandant to a young sergeant, "I have seen you talking to Americans several times. Can you speak English?" "No, mon commandant," answered Henri simply. For all that, Henry and the American officer were soon engaged in vivacious conversation. At its conclusion the commandant turned to Henri. "But you speak English very well," he said. "No, mon commandant," Henri still insisted. "We were talking in German."

Results Count. The American—What happened to you? The Tommy—To tell you the truth, I ain't quite certain. About ten minutes ago I was 'avin' a tete-a-tete with a German sapper. He was a nice-looking boy—ad a face like a murderer. We was crawlin' on our stumicks, when we come face to face. He says somethin' to me in German, an' I answers him in just as bad language. "What happened then?" "Well, I 'ates to brag; but I'm 'ere an' 'e ain't."—Exchange.
