

Geo. Trine

RED CLOUD

We believe that it pays to give our customers service and satisfaction; that is why we want to sell you a

DE LAVAL
CREAM SEPARATOR

No matter what anyone may tell you, there is only one speed at which you can turn a separator crank and get all the cream and cream of uniform thickness, and that's the speed indicated on the crank.

Every hand-operated cream separator has the correct number of turns of the crank handle per minute plainly indicated upon the crank handle. Every separator, of whatever make, will do better work at the proper and indicated speed than at any other.

BELL SPEED-INDICATOR
The "warning signal" that issues operation at the proper speed.

Every one of the NEW De Laval's has a Bell Speed-Indicator. When you slow down, the bell rings. It warns you every time the handle goes around too slowly. You can't be mistaken about it.

The Bell Speed-Indicator adds nothing to the price but much to the value of the NEW De Laval.

Come in and see how the Bell Speed-Indicator works.

THE RED CLOUD CHIEF

THE ONLY DEMOCRATIC PAPER IN WEBSTER COUNTY

Do you belong to the Commercial Club? If not, why not?

The cry of suffering humanity would not be heard o'er the world if right had always reigned.

Make another little investment in W. S. S. Buy one more—and then another one. It's an investment that can't go wrong.

Good roads are a basic item in both city and country prosperity. The sooner this is admitted and put into practice the sooner will prosperity be accelerated.

Profiteering in potatoes is not a bright prospect just at present. It is reported that there are thousands of bushels in the North Platte valley for which the owners are expressing willingness to take fifty cents per bushel.

A great big section of the difficult railroad problem would be eliminated were the country at large to take up and push forward the good roads proposition. Motor transportation is coming rapidly to the front and good roads will go far toward making this both practical and profitable.

Since the beginning of history the world has been striving for peace. And has been traveling over the war path to attain its objective. It is time to blaze a new trail—to eliminate the terrible cost of obsolete methods—to set up an international court of arbitration—in short to establish a League of Nations.

President Wilson has displayed a new angle in his already dominant personality. He becomes a "stand-patter." This anent the League of Nations. Just now he receives voriferous criticism therefor. Perhaps future history will rectify this. It did in the cases of Washington and Lincoln.

We note that Messrs. Hamilton and Trine were appointed to look up ordinances and suggest methods of enforcement in the matter of cleaning up the streets and alleys. The City Council is to be complimented both for its effort in civic betterment and its choice of men to forward the movement. Wake up, Red Cloud. Lend a hand and let's see a nice job of spring-cleaning.

Senator Borah's assertion that the League of Nations proposition is being wrecked Europe for the last three hundred years seems to have produced pleasure among the wreckers rather than consternation among the earnest honest advocates of world-peace. Senator Borah, et. al. might do well to remember that throwing boomerangs is dangerous sport for the novice.

The Sinn Feiners now propose to block the league of nations. With Champ Clark, Senator Penrose, Jeremiah Beveridge and the national security league in grand array on that side, the case for the league gets pretty blue. On the other side, thus far, is nothing but Great Britain, France, Italy, the people of the United States and ten other nations, including the united labor of the world, the united churches, and, with Mr. Gary in probably the united business of the world.—State Journal.

The World-Herald, located at Omaha, devotes considerable space to what is being done with the moneys of the Law Enforcement Fund. Already the expense bill has absorbed

over \$8,000. Some of the items verge on the ridiculous, but in its entirety the money is being well spent. We note our fellow-townsmen O. D. Hedge checked up with salary \$112.50, expense bill \$177.32. The report is too lengthy for reproduction in these columns. The point of interest lies not in the fact that outlay is five times its average in former years, but that O. D. Hedge and thirty-nine other deputies are stamping out bootlegging. They are doing their work and properly enough, getting paid for it.

The Twenty-second Pennsylvania district has been republican ever since the party was founded with the exception of the single year of 1912 when the party was divided. Thru the death of a republican member who was elected last November by a plurality of 8,231, the seat became vacant and was filled a week ago by the election of a democrat by a plurality of 473. At this distance one hesitates to comment upon such an up-set. It may have been due to a variety of causes. On the face of the returns it is a victory for President Wilson, for the democratic candidate made a direct appeal for support for himself on the ground that he favored the league of nations and would do everything in his power to support the administration. The republican candidate took no stand, saying he would be governed by his party. No doubt disgust over the antics of congress in its closing weeks had a great deal to do with this over-turn. The republican managers must realize that when they go before the voters for support next year they must have something more tangible to build upon than the anarchy that disgraced congress in the closing hours of the session.

Farm Bureau Notes

PURE BRED LIVE STOCK
Does it pay to keep Pure Bred Live Stock? This question was answered Saturday, March 1st, when Clarence Johnson sold 50 head of Duroc-Jersey bred sows for an average of \$107.30. I have been on Mr. Johnson's place a number of times the past months and know that these sows that were run through the sale ring received no better care or feed than the rest of the hogs on the place, and after deducting the expense of holding the sale and etc., he has better than \$1000 more money than he would have received if he had put these hogs on the market.

This was Mr. Johnson's first sale, and owing to the impassable conditions of the roads, the number of buyers present was few, and the sale being held on Saturday were factors in keeping down the price to what it would have been had conditions been favorable.

PURE BRED LIVE STOCK FOR THE BOYS

Give the boys a start with pure bred live stock and they won't leave the farm. If the boy gets a good pig or calf he has something that he will be proud of and that its worth taking care of and his interest in the farm work that you want him to help you with during the summer is much keener and the profit he will make out of his pig or calf will be his summer wages, and past records show that this profit amounts from \$50 to \$300.

COUNTY AGENT WORK FOR BOYS

During the past year as county agent I have used every available opportunity to work for the betterment of conditions for the boys on the farm. Last fall considerable time was spent on student judging teams, having them judge live stock raising, and pig club work, hoping that they will take up agriculture and live stock raising as thier life work.

The value of this work cannot be estimated in dollars and cents. Yet I believe it to be the most valuable of any line of work I have carried on during the past year.

TWENTY PLUS FIFTY IS MORE THAN FIFTY PLUS TWENTY

Twenty plus fifty is more than fifty plus twenty. This rule is true when life's work is added up. Today a boy is twenty, a man is fifty. We give both a scientific knowledge of agriculture and the secret of raising better live stock. Three score years and ten they live and labor. At the end of life the boy's product from soil and toil will exceed and excel that of the man who waited until fifty to begin to farm the best he could.

After the lesson was learned, the boy had fifty years to labor, the man had only twenty. Persuading the boys to start aright in life is building better than we know. The good that is done reaches into years far ahead. There is gold in dirt. The riches of a commonwealth are multiplied by giving to farmer boys skillful hands and cunning brains.

He who plows and plants adds wealth to the nation. Twenty plus fifty is more than fifty plus twenty.
HENRY R. FAUSCH,
County Agricultural Agent

ORPHEUM
